Q-Interline A/S receives repeat order from leading player in the rendering industry

24.11.2026 13:39:55 CET | Q-Interline A/S | Investor News

Q-Interline has received an order for a Quant instrument from an existing Danish customer operating within the rendering and animal by-product industry.

The order is a replacement of an existing instrument and reflects the customer's continued confidence in Q-Interline's technology and support capabilities. Following delivery, the system will be installed remotely by Q-Interline and integrated using the customer's existing calibration models, ensuring a smooth and efficient transition with minimal disruption to operations.

Delivery and installation are expected to take place in December 2026.

The customer is part of a major international group within the rendering and animal by-product industry, where reliable process control and quality assurance are essential. The order further strengthens Q-Interline's position within this sector and demonstrates the long-term value delivered through close customer relationships and proven analytical solutions.

"We are very pleased that this customer has chosen to invest in a new Quant instrument from Q-Interline. Continued business with our existing customers is one of the strongest validations of the value we create. It confirms that our technology, application expertise, and customer support continue to meet the evolving needs of the industry," says Per Sand, VP Global Sales.

About Q-Interline A/S

Q-Interline is a technology company that develops high-tech analytical solutions for optimising process efficiency and product quality, based on infrared spectroscopy and correct sampling techniques.

The company develops both its own front-end software solutions and software for automated cloud-based monitoring of analytical instruments and mathematical calibration models.

Q-Interline is among the leading suppliers of analytical equipment to the dairy industry in Scandinavia and has delivered analytical systems to customers in 53 countries worldwide across the food and dairy industries, agriculture, pharmaceutical manufacturing, and

the chemical industry.

For more than 30 years, the company has accumulated extensive industry expertise and developed innovative patented solutions for food analysis. Today, Q-Interline offers a competitive product portfolio built on leading-edge technology.

Through its solutions, Q-Interline contributes to the sustainable use of raw materials in food production while helping to ensure that the quality of produced food supports the health and well-being of both humans and animals.
