

14 May

SmartField Grand Opening

We invite you to our Grand Opening of SmartField. Join the event to learn more about SmartField and the steps towards reducing national N₂O emissions from agricultural fields.

We are pleased to invite you to the Grand Opening of SmartField - a groundbreaking initiative to reduce agricultural nitrous oxide (N₂O) emissions.

SmartField unites leading partners in an innovative effort to reduce Denmark's agricultural N₂O emissions.

Our vision is to achieve a 20-30% reduction in agricultural N₂O emissions by 2030, while maintaining crop yields and preventing nitrogen pollution displacement.

Join us to discover:

- The background and vision of SmartField
- Cutting-edge emission reduction technologies and solutions testing
- Smart data collection approaches on-site
