“In a volatile market and despite geopolitical uncertainty, we demonstrated our ability to grow and thrive, a success built upon a clear and deliberate product and platform strategy. In Q4, we realised 10% organic revenue growth and delivered an organic adjusted EBITDA margin of 17.9%. Including our acquisitional merger with SDC A/S, we grew revenue by 35.5% in the quarter and delivered an adjusted EBITDA margin of 17%.

Our product and platform focus has been pivotal in large contract wins in Q4, most notably the TSS contract in the UK.

In addition, we are pleased to see that the integration of SDC into Netcompany Banking Services is progressing faster than initially anticipated, with the first synergies already starting to materialise during the quarter.

For 2026, we expect the Group excluding Netcompany Banking Services to grow revenue between 5% and 10% and realise an adjusted EBITDA margin between 16% and 19%. Including Netcompany Banking Services, we expect to grow revenue between 15% and 20% and to deliver an adjusted EBITDA margin between 15% and 18%.

In line with previous commitments, we will initiate a new share buyback programme of DKK 750m to be completed by the end of January 2027.

We firmly believe the future belongs to European product and platform companies that leverage components and AI to deliver solutions in a fast, reliable, and responsible way.”

Reported adjusted EBITDA increased 15.9% to DKK 1,272.5m in 2025. NBS impacted adjusted EBITDA positively by 7.6 percentage points, while adjusted EBITDA margin was negatively impacted by 0.8 percentage points.

Special items amounted to DKK 355.3m in 2025 and were related to redundancies, termination of leases and contracts for services no longer required, as well as various costs related to retention and integration efforts in relation to the merger of SDC into NBS and advisory costs related to the transaction.

Depreciation and amortisation were DKK 355.5m in 2025, compared to DKK 304.3m in 2024. Of these, DKK 27.8 m was related to the addition of NBS during the year.

Operating profit (EBIT) was DKK 561.8m in 2025 compared to DKK 785.5m in 2024. The decline in EBIT was a result of the special items recognised in 2025. Adjusted for special items EBIT increased 16.8%.

Net financials were negative DKK 169.2m in 2025, compared to negative DKK 145m in 2024.

Profit before tax was DKK 375.7m compared to DKK 624m in 2024, negatively impacted by special items. Tax on profit for the year was DKK 118.7m, yielding an effective tax rate of 31.6% compared to 25.1% in 2024. The increase in effective tax rate was a consequence of non-deductible costs in relation to the merger.

Net profit for the year was DKK 256.9 compared to DKK 467.5m in 2024, negatively impacted by special items and the increase in effective tax rate.

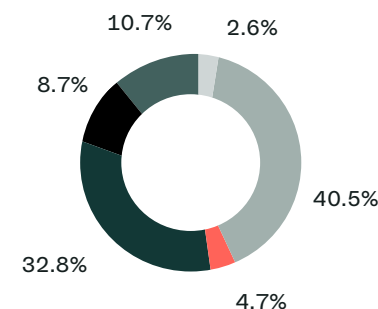

<sup>1</sup> As of 1 July 2025, Netcompany completed the acquisition of SDC A/S through a taxable merger, whereby former SDC was merged into a newly formed company - Netcompany Banking Services A/S, fully owned by Netcompany.

**Netcompany Denmark**

Revenue in Netcompany Denmark increased 3.6% to DKK 3,199.9m in 2025. Revenue was mainly driven by growth in the private sector, which increased revenue by 8.2%, whereas revenue grew by 0.8% in the public sector.

The first six months of 2025 were affected by resources spent on product and business development as well as preparation work for the integration of SDC into Netcompany Banking Services. However as expected, the level of these activities decreased during the second half of 2025.

Gross profit margin was 38.1% in 2025, in line with 2024. Although resources were used for tasks related to product and business development, the Danish segment's performance was maintained by a strong second half.

Client facing FTEs grew less than 1% in 2025 and was related to FTEs hired in entities outside of Denmark working on Danish projects.

In 2025 adjusted EBITDA margin was 23.7% compared to 24.3% in 2024.

**Netcompany SEE & EUI**

In Netcompany SEE & EUI revenue grew 12.5% to DKK 2,593.2m in 2025. Revenue growth was driven by strong performance within both the public sector including the EU and the private sector, which grew revenue by 11.2% and 16.6%, respectively.

Client facing FTEs grew by 7.5% in 2025.

In 2025 adjusted EBITDA margin was 14.4% compared to 13% in 2024. The improvement in adjusted EBITDA margin was a result of lower admin costs.

**Netcompany UK**

Netcompany UK grew revenue 13.5% to DKK 688.2m in 2025. The growth was driven by the public sector which grew revenue 20.8% during the year, while private sector revenue declined 2.9%, as a result of discontinuation/completion of historical low-margin contracts. During the year Netcompany's public sector presence in the UK has increased, as a combination of new contract wins and increased engagements with existing customers.

Gross profit margin was 21.1% in 2025 compared to 19.4% in 2024. The improved margin was a result of better utilisation and discontinuation of historical low-margin contracts.

Client facing FTEs grew by 12.6% in 2025.

Adjusted EBITDA margin was 10.6% in 2025 compared to 8.4% in 2024.

**CONTINUED BUSINESS SEGMENTS 12 MONTHS**

**Netcompany Netherlands**

Gross profit margin was 33.9% in 2025 and in line with 2024.

Client facing FTEs grew by 9.9% in 2025.

Adjusted EBITDA margin in 2025 was 19.6% compared to 21.7% in 2024, mainly as a consequence of the slightly lower gross profit margin.

**Netcompany Banking Services**

As the merger between SDC and Netcompany Banking Services (NBS) was closed as of 1 July 2025, pro forma results<sup>1</sup> have been applied for the first six months of 2025 to determine 2025 full year results for comparable purpose.

Pro forma revenue for 2025 was DKK 1,652.3m, compared to reported revenue of DKK 1,705.8m in 2024 for SDC A/S. Revenue and earnings in 2024 were positively impacted by exit fees. Revenue of DKK 847.6m was recognised in the second half of 2025 after SDC was merged into NBS.

Pro forma adjusted EBITDA was DKK 110.1m in 2025, of which DKK 83.7m was generated in the second half of 2025, compared to pro forma adjusted EBITDA of DKK 109.2m in 2024 for SDC. To compare “like for like”, pro forma adjusted EBITDA was adjusted for capitalisations<sup>2</sup> in 2024 and first half of 2025.

Pro forma adjusted EBITDA margin was 6.7% in 2025, compared to pro forma adjusted EBITDA margin of 6.4% in 2024 in SDC. In the second half of 2025, NBS de-

livered an adjusted EBITDA margin of 9.9% compared to proforma adjusted EBITDA margin of 6.5% in the same period last year. The improvement in margin was a result of the integration of SDC into NBS and the materialisation of synergies.

As a result of the integration of SDC into NBS, restructuring and integration costs of DKK 304.8m, including the impairment of right of use assets by DKK 73.1m, was recognised as special items in 2025. End of year a restructuring provision of DKK 212.6m remains, covering costs to be incurred towards 2028. This includes costs related to redundancies, leases terminations, termination of contracts for services no longer required, as well as various costs related to retention and integration efforts.

As a consequence of the merger, NBS was required to exit the ownership of JN Data as per the stipulated shareholders agreement.

<sup>1</sup> Pro forma figures covers unaudited figures in SDC A/S in the first six months of 2025 and reported figures in NBS.

<sup>2</sup> Pro forma adjusted EBITDA have been adjusted for capitalisations, hence this was the practice in SDC A/S prior to the merger between NBS and SDC.

# Revenue visibility

Revenue visibility for 2026 amounts to DKK 6,669.6m, of which contractual committed revenue amounts to DKK 6,341.4m and non-contractual committed engagements amount to DKK 328.2m.

Revenue visibility for the Group excluding Netcompany Banking Services (NBS) improved by 8.1% from DKK 4,895.6m for 2025 to DKK 5,290.9m for 2026.

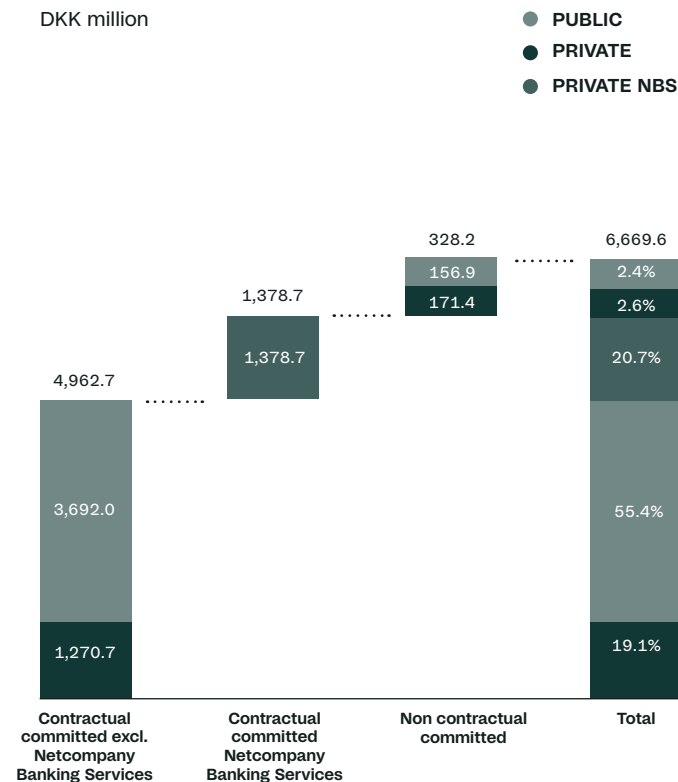

As of 1 July 2025, Netcompany assumed 100% ownership of SDC by merging it into NBS. We therefore distinguish between revenue visibility for the Group and revenue visibility for the Group excluding NBS. All revenue visibility for NBS relates to the private sector.

Revenue visibility in the public sector therefore relates solely to the Group excluding NBS and amounts to DKK 3,848.9m for 2026, an increase of 9.5% compared to last year, of which contractual committed revenue amounts to DKK 3,692m and non-contractual committed engagements amount to DKK 156.9m.

Revenue visibility for the Group excluding NBS in the private sector amounts to DKK 1,442.1m for 2026, an increase of 4.5% compared to last year, of which contractual committed revenue amounts to DKK 1,270.7m and non-contractual committed engagements amount to DKK 171.4m.

## Revenue visibility for the financial year 2026

DKK million

<sup>1</sup> At Netcompany, we measure revenue visibility for the next 12 months based on two parameters: the total value of committed engagements, which includes fixed price engagements and service agreements, and ongoing time and material engagements with a high likelihood of conversion or prolongation.

Revenue visibility encompasses both contractual and

non-contractual committed engagements. Contractual committed engagements refer to the total value of engagements where a clear, mutual agreement on delivery and payment has been established with the customer, approved by both parties, and where payment is expected. Non-contractual committed engagements are highly expected engagements without formal contracts.

# Workforce

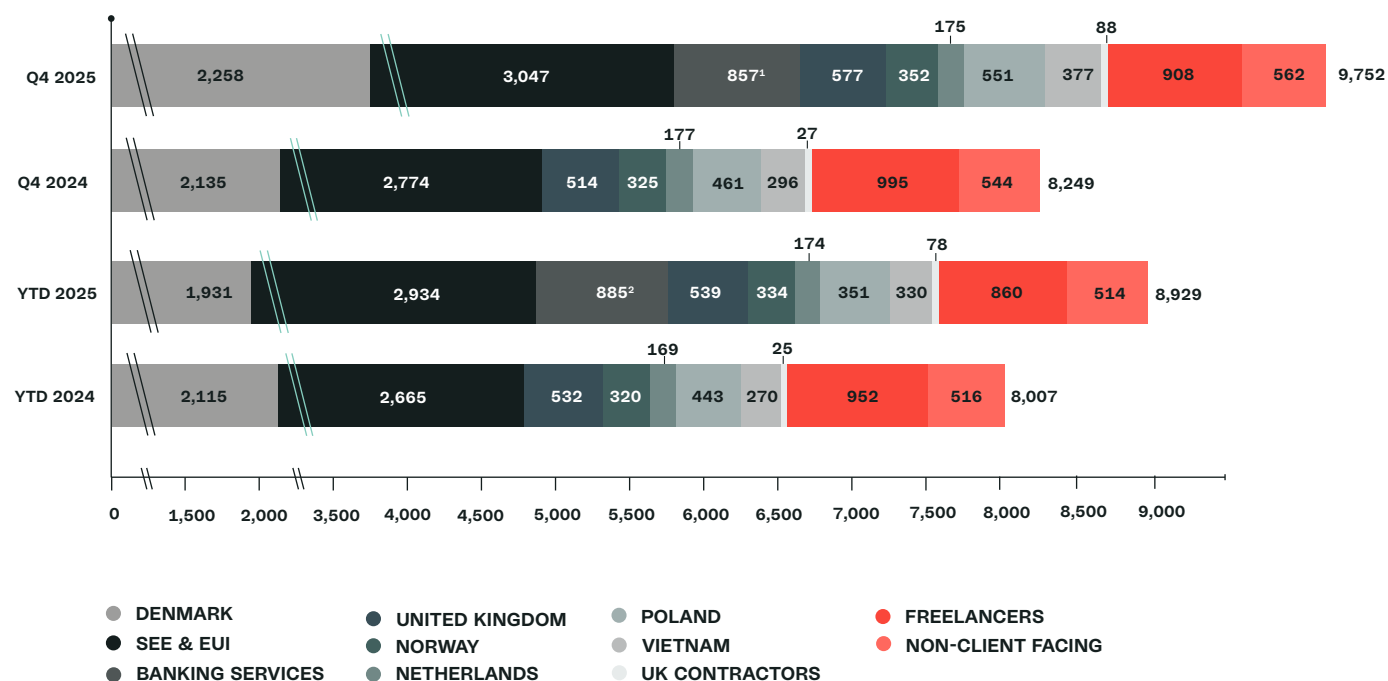

Netcompany employed an average of 9,752 FTEs in Q4 2025, equal to an increase of 1,503 FTEs or 18.2% compared to Q4 2024 (8,249 FTEs). On a sequential basis FTEs in Q4 2025 increased 2.9% compared to Q3 2025.

Excluding Netcompany Banking Services (NBS), the number of client facing FTEs for the Group increased by 554 from 7,705 in Q4 2024 to 8,259 in Q4 2025, while the level of non-client facing FTEs decreased from 6.6% in Q4 2024 to 6.3% in Q4 2025.

Freelancers in the organic part of the Group decreased 5.5% from 995 in Q4 2024 to 876 in Q4 2025 driven by the decrease in freelancers in Netcompany SEE & EUI. The increase in UK contractors was due to ramp up on public deliveries, sequentially the increase was limited compared to Q3 2025.

The attrition rate for the last twelve months was 18.1% for the organic part of the Group, which was on par with the same period last year. On a sequential basis the churn rate was in line with Q3 2025. Furthermore, the 3 months rolling churn rates decreased 0.2 percentage points compared to Q4 2024.

**Avg. FTEs increased to 9,752 during Q4 2025**

NBS is in the initial phase of a significant and structural reorganisation which naturally will lead to relatively higher churn in NBS than previously experienced as redundancies are realised. NBS stand alone attrition rate was 27.5% for the last 6 months of 2025.

<sup>1</sup> As of 1 July 2025, Netcompany Banking Services, formerly SDC, was included in the Group. Average FTE figures for Netcompany Banking Services includes freelancers and non-client facing FTEs.

<sup>2</sup> Average FTE figures for YTD 2025 in the illustration equals FTEs average for second half of 2025 for Netcompany Banking Services.

# Capital and other financial positions

## Free cash flow and cash conversion rate<sup>1</sup>

The Group generated free cash flow of DKK 317.9m in Q4 2025, compared to DKK 532.4m in Q4 2024, which was all time high. Adjusted for taxes paid on account, the Group generated free cash flow of DKK 305.2m in Q4 2025 compared to DKK 569.3m in Q4 2024.

The development in free cash flow was caused by the working capital changes and thereby more than offset the increase in EBIT during the same period. The changes in working capital were mainly driven by a significant increase in pre-billed invoices in Q4 2024, which end of Q4 2025 was on level with end of Q3 2025.

Despite the development in free cash flow cash and a decline in cash conversion rate, cash conversion rate for Q4 2025 was realised at 178.5%. Adjusted for the taxes paid on account, cash conversion rate was 171.4% in Q4 2025 compared to 407.8% in Q4 2024.

For the full year, Netcompany generated a free cash flow of DKK 355.8m corresponding to a decrease of 56.7% compared to DKK 821.1m in 2024, mainly driven by a

more normal development in working capital, and to some extent impacted by the special items expensed during the year. The negative development in net work in progress during the year was due to significant increase in pre-billed invoices at the end of 2024 impacting 2025 negatively, as well as timing of milestone payments on significant projects mainly within public contracts throughout the Group.

Full year cash conversion rate normalised to 97.7% compared to 147.1% in 2024, reflecting a natural adjustment after two years where balances, particular in work in progress, that had previously been built up were released as cash towards the end of the year.

## Trade receivables

At 31 December 2025, Group trade receivables was DKK 1,373.1m which was 7.1% above DKK 1,282.6m in 2024 and despite 20.7% growth in revenue.

The development was mainly caused by the inclusion of Netcompany Banking Services, that to a higher extent delivers services to prepaying clients.

DKK million	Not overdue	0-30 days	30-60 days	60-90 days	>90 days	Provi- sion	Total
<b>Trade receivables, 31 December 2025</b>	<b>978.2</b>	<b>234.2</b>	<b>34.2</b>	<b>20.5</b>	<b>109.0</b>	<b>-3.0</b>	<b>1,373.1</b>

Days sales outstanding decreased from 72 days end of 2024 to 64 days end of 2025 following the inclusion of Netcompany Banking Services.

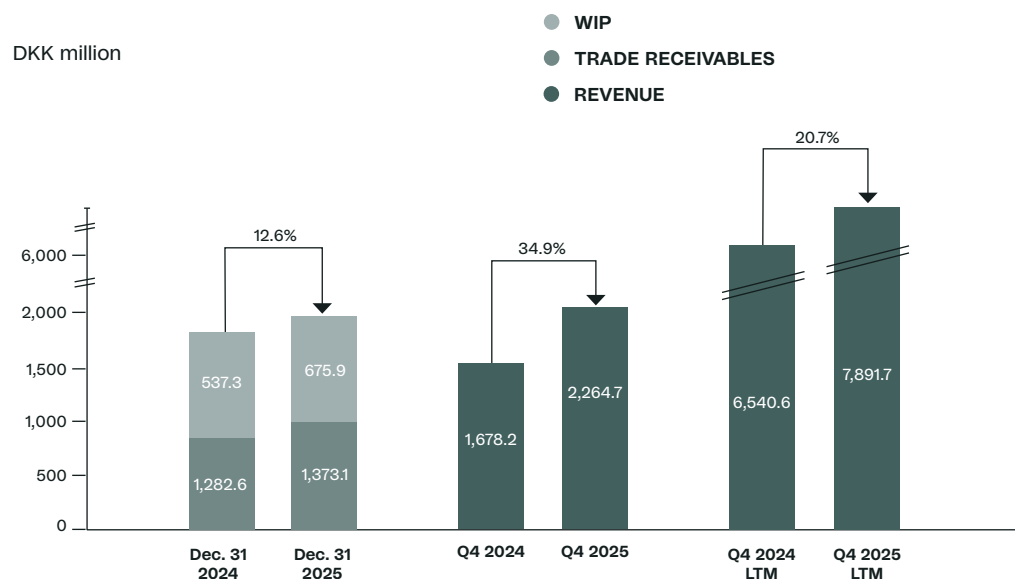

The overdue part of trade receivables excluding expected credit losses increased from 23.8% by the end of Q4 2024 to 28.9% by the end of Q4 2025. The overdue part of trade receivables overdue by more than 30 days accounted for 11.9% end of Q4 2025, compared to 10.8% end of Q4 2024.

Trade receivables paid in the following month amounted to DKK 851.6m in January, of which DKK 210.7m was overdue end of December, equal to a repayment of 62% of the total balance.

<sup>1</sup>Taxes paid within the Group are, due to local tax regulations, paid on account in Q1 and in Q4. To adjust for this timing mismatch between expensed and paid corporate income taxes the free cash flow should be viewed in a tax normalised manner to better reflect the underlying development in free cash flow based on operations rather than impact from local tax legislation in Denmark.

## Financial performance against original guidance

In 2025, we achieved 7.9% organic revenue growth in constant currencies and maintained organic adjusted EBITDA margin on par with last year. Total revenue grew 20.8% in 2025, as a consequence of the inclusion of Netcompany Banking Services.

We saw positive momentum across the business, with all segments supporting organic revenue growth. Netcompany SEE & EUI once again delivered strong results, and the UK public sector gained traction as key projects began to scale.

Organic adjusted EBITDA margin for 2025 was 16.9%. Despite a significant amount of resources spent on product and business development as well as resources spent on

preparing for the integration of SDC — most significant in the first half of the year — we delivered margins in line with last year. During the second half of 2025 we saw an increase in margins as these efforts started to normalise.

## Guidance for 2026

Our financial guidance for 2026 assumes that macroeconomic and geopolitical uncertainties will remain at the levels observed in 2025. We expect the focus from end customers on European sovereign identity to persist into 2026, and view this as supportive to our growth. Likewise, we expect the increased focus on obtaining actual production gains and efficiency from AI to be supportive to our growth too, as AI is embedded into our products and platforms.

Consequently, we expect revenue growth for the Group, measured in constant currencies, to be between 15% and 20% including Netcompany Banking Services for the full year. We expect adjusted EBITDA margin for the Group — also measured in constant currencies and including Netcompany Banking Services (NBS) for the full year to be between 15% and 18%.

For the Group excluding NBS, we expect revenue growth of 5% to 10% and adjusted EBITDA margin of between 16% and 19% — all in constant currencies.

We will initiate a share buyback programme to run from the release of the annual report for 2025 and until the end of January 2027. The size of the programme is DKK 750m which will bring total share buyback pro-

gramme from 2024 to 2026 to DKK 2bn — in line with previous commitments.

## Long-term targets

We commit to the long-term targets as outlined below. Based on the gradual realisation of synergies in NBS we expect to reach an adjusted EBITDA margin for the Group above 20% by 2029.

- Long-term organic revenue growth for the Group through any business cycle of between 5% and 10% annually.
- Adjusted EBITDA margin above 20% for the Group to be reached by 2029.

At 1 July 2025, Netcompany completed the transaction of DKK 1 billion in cash to SDC's shareholders based on the agreement between Netcompany Group, SDC A/S and a majority of SDC's shareholders.

The determination of the purchase price and the purchase price allocation is considered final.

Based on the measurement of identifiable assets and liabilities at their fair values, the difference between the total consideration and the fair value of the identified

net assets were calculated at DKK 606.4 million, which represents the goodwill from the acquisition of Netcompany Banking Services (NBS, formerly SDC).

In addition, the consideration paid for the business combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of NBS. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

Goodwill is deductible for tax purposes under Danish law, and both goodwill and customer values will be eligible for tax deduction over a 7-year period.

Assets and liabilities recognised have been adjusted for differences in the accounting policies between the IFRS and the Danish GAAP (previously used by SDC). Notably, leases previously expensed under Danish GAAP have been capitalised as "right of use" assets and amortised over the lease term. The value of own developed software has been substantially reduced in the

Purchase Price Allocation and reallocated to customer relationships and goodwill, reflecting the IFRS requirement for capitalisation only where a future delivery obligation exists.

As a consequence of the merger, NBS exited the ownership of JN Data and received DKK 66.1 million for the shares in 2025.

The Group has recognised M&A and restructuring costs totalling DKK 355.3m in 2025 (DKK 4.2m in Q4 2025), which are included in special items.

The new presentation of the income statement offers a clearer view of our operating performance by separating depreciation and amortisation, a non-cash expense, from our operating earnings. The effect of the change has been retrospectively applied to the comparison figures for 2024, improving the "gross profit" line by DKK 5.4m in Q4 2024, DKK 22.3m for the full year of 2024, now part of the depreciation line presented separately.
