

## **FLS wins multi-year contract to supply mill lining solutions to a gold mine in the ASEA region**

Building on an existing customer relationship, FLS has been awarded a key contract for the delivery of complete mill liner solutions to a gold mining operation in the Australia South-East Asia (ASEA) region. The award, which has an initial term of two years with the option for a five-year extension, builds on FLS' original technology delivery scope for grinding mills and related spares at the site.

A review of historical wear data and global installation performance demonstrated FLS' superior liner performance, driven by advanced liner design and improved technical service. This delivered a highly compelling value proposition to the customer, such as; longer wear life, ongoing product optimisation, wear monitoring and strong service support leveraging FLS' global service network coupled with the expertise of the local mill lining team.

The award is a major mill liner contract win for FLS in the region. It demonstrates FLS' capability as a leading OEM supplier of mill lining solutions strengthens our market presence and establishes a strong reference site for future growth opportunities.

*"This is a strategically important contract award for FLS, marking a significant milestone in this region. The win showcases our ability to deliver superior mill lining performance, build strong customer partnerships and compete successfully in established competitor strongholds",* comments Alanas Kraujalis, Interim Service Business Line President at FLS.

The order value, which was booked in the second quarter of 2026, has not been disclosed.
