# FLS signs lifecycle agreement with Lloyds Metals and Energy Limited, reinforcing long-term partnerships in India's growing mining sector

**FLSmidth (FLS) today announces that it has signed a lifecycle agreement with Lloyds Metals and Energy Limited (LMEL), one of the leading iron ore mining and metals processing companies in India. The order value has not been disclosed.**

The agreement, which covers the full FLS equipment flowsheet across LMEL's mining operations, marks a significant step in FLS' ambition to deepen long-term customer partnerships across the Indian subcontinent and reinforces its support of customers across the full lifecycle of their operations. As part of the broader partnership, FLS and LMEL are also developing a state-of-the-art repair centre, bringing advanced repair and service capability closer to the installed equipment base and supporting faster response, improved availability and long-term asset performance. The agreement builds on a series of orders received from Lloyds Metals over the past two years and reflects the continued development of a strong, long-term partnership between the two companies.

LMEL operates the single largest iron ore mine in India and is in the process of significantly scaling its production and processing capacities. This agreement reflects a shared commitment to drive operational excellence and support the responsible development of India's mining industry. To support this growth, the agreement covers the full scope of a lifecycle partnership, combining a dedicated on-site FLS team, a bespoke maintenance programme, continuous learning programme for long-term upskilling including operation readiness training and on-site management of consumables and spare parts, all aimed at maximising equipment uptime and reliability as LMEL's operations scale up.

Alanas Kraujalis, interim President, Service Business Line at FLS, comments: "*We are pleased to enter this agreement with Lloyds Metals and Energy Limited. To be entrusted as a long-term partner for a company of LMEL's scale and ambition is a testament to the expertise and dedication of our teams, and to the value our lifecycle approach delivers for customers. We look forward to working closely with LMEL's to keep their plant's equipment performing at its best, supporting their growth and contributing to the continued advancement of mining in India.*"
