New share buyback programme

The bank's board of directors has decided to launch a new share buyback programme for DKK 400 million as part of the allocation of profit for the 2026 financial year.

The new share buyback programme will be launched when the current DKK 400 million share buyback programme finishes.

The decision on the new share buyback programme conforms to the bank's distribution policy and was made following approval by the Danish FSA.

Kind regards

Ringkøbing Landbobank
