Forward-looking statements

The expectations, forecasts and statements regarding future developments that are contained in this report are, of course, based on assumptions and are contingent on a number of factors that will come into play in the future. Consequently, the actual situation may turn out to be (substantially) different.

Management certification

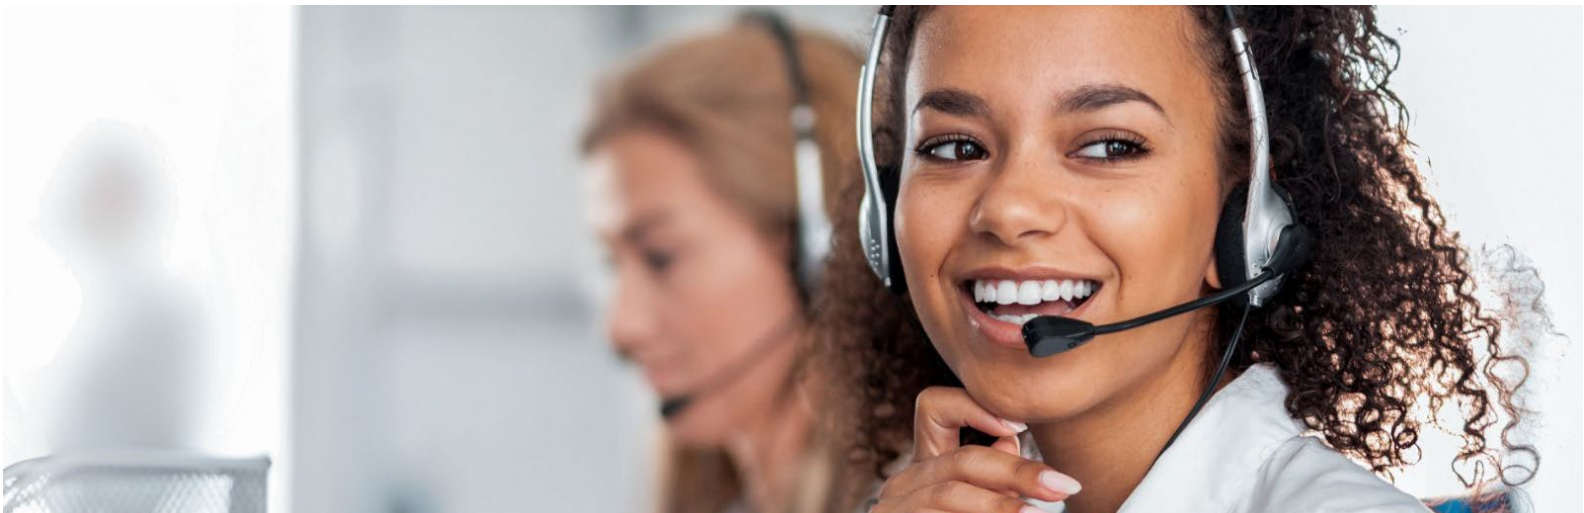

'I Bartel Puelinckx, Chief Financial Officer of the KBC Group, certify on behalf of the Executive Committee of KBC Group NV that, to the best of my knowledge, the abbreviated financial statements included in the quarterly report are based on the relevant accounting standards and fairly present in all material respects the financial condition and results of KBC Group NV including its consolidated subsidiaries, and that the quarterly report provides a fair view of the main events, the main transactions with related parties in the period under review and their impact on the abbreviated financial statements, and an overview of the main risks and uncertainties for the remainder of the current year.'

Parent shareholders' equity per share (in EUR, end of period)	66.1	64.3	60.8	66.1	60.8

'We recorded an excellent net profit of 1 142 million euros in the third quarter of 2026. Compared to the previous quarter, our total income benefitted from higher insurance revenues, net fee and commission income, trading and fair value income, and net interest income (excluding the significantly lower net interest income on inflation-linked bonds). Net other income, on the other hand, was down, as was dividend income, following its seasonal peak in the second quarter. Our loan portfolio grew organically by 2% quarter-on-quarter and by as much as 7% year-on-year. Hence, year-to-date, organic loan growth has already surpassed our guidance for full-year 2026. Customer deposits – excluding volatile, low-margin short-term deposits at KBC Bank's foreign branches – fell organically by 1% quarter-on-quarter due to seasonality, retail government bond issues and shifts towards asset management products, but rose by 3% year-on-year. Disregarding bank and insurance taxes, operating expenses were up 3% quarter-on-quarter, but on a year-to-date and like-for-like basis (disregarding forex effects, the recent acquisitions and the exceptional bonus paid to staff), they remained perfectly in line with our full-year 2026 guidance. Insurance service expenses after reinsurance were up quarter-on-quarter, while total impairment charges were largely in line with the level recorded in the previous quarter, with the decrease in non-loan related impairment more or less offsetting the increase in loan loss impairment. Compared to year-end 2025, our year-to-date credit cost ratio improved to 12 basis points in the first nine months of 2026 when the reserve for geopolitical and macroeconomic uncertainties and the recent acquisition of 365.bank are excluded.
Consequently, when adding up the results for the first three quarters of the year, our year-to-date net profit amounted to 2 851 million euros, up 11% on the year-earlier figure.

Our solvency position remained strong, with an unfloored fully loaded common equity ratio under Basel IV of 14.6% at the end of September 2026. Our liquidity position remained very solid too, as illustrated by an LCR of 157% and an NSFR of 131%. In line with our dividend policy, we paid out an interim dividend of 1 euro last week as an advance on the total dividend for financial year 2026.

Kate, our digital assistant, has already reached 6.4 million customers across our core countries and is at the centre of our digital innovation strategy, playing a pivotal role in delivering faster, smarter and more personal services to our customers. Kate now solves more than 75% of customer questions fully autonomously and also plays an increasingly important role in our ecosphere approach. These ecospheres allow customers to retrieve useful information, obtain guidance and support and run simulations for, for instance, mobility and housing-related matters, while the digital interaction with the customer provides useful leads for KBC to reach out and set up a further dialogue. To date, our 'MyMobility' ecosphere has already onboarded approximately 450 000 customers in Belgium and the Czech Republic, while close to 90 000 customers in Belgium have already been onboarded to the 'MyHome' ecosphere. Our successful focus on innovation and customer convenience is also reflected in the external recognition we receive. We are, for instance, very proud that KBC Mobile has been named the world's best mobile banking app for the third year in a row by independent research firm Sia.
We repeat that, to provide additional insight into our digital journey, we will extend the usual conference call regarding the fourth-quarter and full-year results for 2026 on Thursday 11 February 2027 with a topical event on the digital transformation of our group, leading to new financial and non-financial guidance.

I'd like to take this opportunity to sincerely thank all our employees for their contribution to our group's continued success. I also wish to thank all our customers, shareholders and all other stakeholders for their trust and support, and to assure them that we remain committed to being the reference in bank-insurance and innovation in all our core markets.'

Johan Thijs
Chief Executive Officer

The cornerstones of our strategy

- We place our customers at the centre of everything we do
- We look to offer our customers a unique bank-insurance experience
- We focus on our group's long-term development and aim to achieve sustainable and profitable growth
- We assume our role in society and local economies
- We build upon the PEARL+ values, while focusing on the joint development of solutions, initiatives and ideas within the group

Financial highlights in 3Q2026

Net interest income increased by 1% quarter-on-quarter when excluding the significantly lower net interest income on the inflation-linked bonds, and by 16% year-on-year (14% year-on-year on an organic basis, i.e. excluding the recent acquisitions of 365.bank and Business Lease). The net interest margin for the quarter under review amounted to 2.17%, down 6 basis points on the previous quarter and up 12 basis points year-on-year (10 basis points on an organic basis). Customer loan volumes increased organically by 2% quarter-on-quarter and by 7% year-on-year. Customer deposits – excluding volatile, low-margin short-term deposits at KBC Bank's foreign branches – were down organically by 1% quarter-on-quarter (due to seasonality, retail government bond issues and shifts towards asset management products) and were up by 3% year-on-year.

The insurance service result (insurance revenues before reinsurance - insurance service expenses before reinsurance + net result from reinsurance contracts held) amounted to 158 million euros, compared to 170 million euros in the previous quarter and 142 million euros in the year-earlier quarter. The insurance service result for the quarter under review breaks down into 86 million euros for non-life insurance and 72 million euros for life insurance. The non-life insurance combined ratio for the first nine months of 2026 came to an excellent 87%, the same as for full-year 2025. Sales of non-life insurance products grew by 9% year-on-year, while life insurance sales were down slightly by 2% and 5% on the level recorded in the previous and year-earlier quarters, respectively.

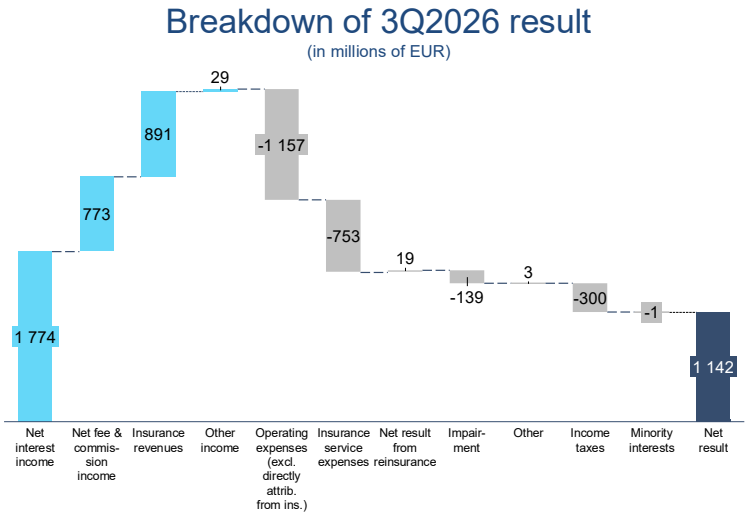

Net fee and commission income was up 2% quarter-on-quarter and 9% year-on-year (7% on an organic basis). Assets under management increased by 1% quarter-on-quarter and by 13% year-on-year.

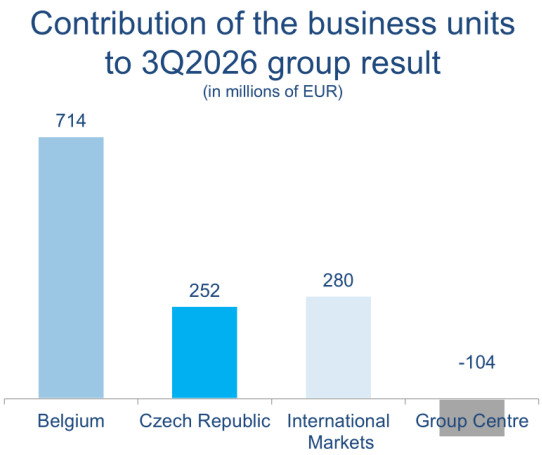

Trading & fair value income and insurance finance income and expense was up by 65 million euros and 36 million euros on the figures for the previous and year-earlier quarters, respectively. **Net other income** was below its normal run rate. **Dividend income** was down on the previous quarter's level, since the bulk of dividend income is traditionally received in the second quarter of the year.

Operating expenses excluding bank and insurance taxes were up 3% quarter-on-quarter and 9% year-on-year (6% on an organic basis). Bank and insurance taxes amounted to 59 million euros in the quarter under review. The cost/income ratio for the first nine months of 2026 came to 43%, compared to 46% for full-year 2025. In that calculation, certain non-operating items have been excluded and bank and insurance taxes spread evenly throughout the year. When excluding all bank and insurance taxes, the cost/income ratio for the first nine months of 2026 amounted to 40%, compared to 41% for full-year 2025.

Loan loss impairment charges amounted to 114 million euros in the quarter under review and included 103 million euros for the loan book (up on the 53 million euros recorded in the previous quarter) and an 11-million-euro increase in the reserve for geopolitical and macroeconomic uncertainties (compared to a 13-million-euro increase in the previous quarter). Excluding the reserve for geopolitical and macroeconomic uncertainties and the impact of the acquisition of 365.bank, the credit cost ratio for the first nine months of 2026 amounted to 0.12%, compared to 0.13% for full-year 2025. Impairment on assets *other than loans* amounted to 24 million euros in the quarter under review (related to software), compared to 69 million euros in the previous quarter and 5 million euros in the year-earlier quarter.

Our **liquidity position** remained strong, with an LCR of 157% and NSFR of 131%. Our **capital base** remained robust, with an unfloored fully loaded common equity ratio of 14.6%*.

* Unfloored fully loaded common equity ratio: account taken of the total impact of Basel IV on risk-weighted assets, excluding the output floor impact.

1 Net result from financial instruments at fair value through P&L is also referred to as 'Trading & fair value income' and Impairment on financial assets at amortised cost and at fair value through other comprehensive income is also referred to as 'Loan loss impairment'.
2 Based on tangible equity, this was 18% for the first nine months of 2026 and 16% for full-year 2025.
3 Unfloored fully loaded common equity ratio: account taken of the total impact of Basel IV on risk-weighted assets, excluding the output floor impact.

Analysis of the quarter (3Q2026)

Total income: 3 467 million euros

+1% quarter-on-quarter and +14% year-on-year

Net interest income amounted to 1 774 million euros, up 1% quarter-on-quarter when excluding the significantly lower net interest income on the inflation-linked bonds, and up 16% year-on-year (14% year-on-year on an organic basis, i.e. excluding the impact of the recently acquired 365.bank and Business Lease).

The 1% quarter-on-quarter increase (excluding the impact of inflation-linked bonds) was due mainly to the further increase in the commercial transformation result, a higher net interest income on the (non-inflation-linked) insurance bond portfolio and a higher number of days in the quarter. These items were partly offset by a negative one-off item in the Czech Republic (consolidation adjustment to intercompany transactions of -8 million euros), a slightly lower level of income from lending activities (the positive effect of the increasing loan volume was more than offset by the negative effect of pressure on margins in most core markets and a positive one-off item in Hungary in the previous quarter), lower net interest income from dealing room, ALM and short-term cash management activities, as well as slightly higher costs related to the minimum required reserves held with central banks and slightly higher wholesale and subordinated funding costs.

The 16% year-on-year increase was attributable primarily to a much higher commercial transformation result, a higher level of income from lending activities, higher interest income on customer term deposits and higher interest income from ALM, dealing room and short-term cash management activities. These items were offset to just a small extent by higher wholesale funding costs and the negative one-off adjustment in the Czech Republic.

The net interest margin for the quarter under review amounted to 2.17%, down 6 basis points quarter-on-quarter and up 12 basis points year-on-year (10 basis points on an organic basis). At 225 billion euros, customer loan volume was up 2% quarter-on-quarter and 9% year-on-year. Excluding recent acquisitions, loan volume was up on an organic basis by 2% quarter-on-quarter and by 7% year-on-year, with increases in every core country. Customer deposits amounted to 247 billion euros and were down 2% quarter-on-quarter and up 6% year-on-year. On an organic basis and excluding volatile, low-margin short-term deposits at KBC Bank's foreign branches (driven by short-term cash management opportunities), customer deposits were down 1% quarter-on-quarter (impacted in some core countries by seasonality, retail government bond issues and shifts towards asset management products) and up 3% year-on-year.

For guidance regarding expected net interest income in 2026 and the years to come, please refer to the 'Our guidance' section.

The insurance service result (insurance revenues before reinsurance - insurance service expenses before reinsurance + net result from reinsurance contracts held; the two latter items are not part of total income) amounted to 158 million euros and breaks down into 86 million euros for non-life insurance and 72 million euros for life insurance.

The **non-life** insurance service result was down 23% quarter-on-quarter, due essentially to higher insurance service expenses (including large claims related to industrial fires in the Czech Republic and Slovakia in the quarter under review), but partly offset by higher insurance revenues and a better reinsurance result (cf. the aforementioned large claims). It was more or less stable year-on-year, as the higher insurance service expenses were fully offset by the increase in insurance revenues and a better reinsurance result. The **life** insurance service result was up 23% quarter-on-quarter, owing mainly to lower insurance service expenses combined with higher insurance revenues, and up 30% year-on-year, thanks largely to the increase in insurance revenues.

The combined ratio of the non-life insurance activities amounted to an excellent 87% in the first nine months of the year, the same as for full-year 2025. At 713 million euros, non-life insurance sales (gross written premiums) were up 9% year-on-year, with growth in all countries and all the main insurance classes. Sales of life insurance products amounted to 800 million euros, down slightly by 2% and 5% on the level recorded in the previous and year-earlier quarters, due in both cases to lower sales of guaranteed-interest insurance products, partly offset by higher sales of unit-linked insurance products. Overall, the share of guaranteed-interest products and unit-linked products in our life insurance sales in the quarter under review amounted to 38% and 54%, respectively, with hybrid products (mainly in Belgium and the Czech Republic) accounting for the remainder.

For guidance regarding expected insurance revenues in 2026 and the years to come, as well as the combined ratio, please refer to the 'Our guidance' section.

Net fee and commission income amounted to 773 million euros, up 2% quarter-on-quarter and 9% year-on-year (7% on an organic basis).

The 2% quarter-on-quarter increase was attributable to higher fees from asset management activities (increased management fees), while fees from banking activities fell slightly (seasonally higher payment-related fees were more than offset by lower fees related to securities transactions and credits, lower network income as well as higher SRT-related coupon expenses). The 9% year-on-year increase was also accounted for by significantly higher fees from asset management activities, while fees from banking activities fell slightly (increases in payment and credit-related fees more than offset by decrease in network income, higher SRT-related coupon expenses and higher distribution commissions paid for banking products, among other factors).

At the end of September 2026, our total assets under management amounted to 330 billion euros, up 1% quarter-on-quarter due to the positive effect of net inflows (+2 percentage points) combined with the effect of the negative market performance in the quarter (-1 percentage point). Our asset management business saw strong net inflows in the quarter under review, both in higher-margin direct customer money (with a record-high increase of 2.1-billion-euro in the quarter) and in lower-margin assets. Assets under management grew by 13% year-on-year, with net inflows accounting for 4 percentage points and the positive market performance during the past 12 months for 9 percentage points.

Trading & fair value income and insurance finance income and expense amounted to -27 million euros, up 65 million euros quarter-on-quarter and 36 million euros year-on-year. The quarter-on-quarter increase came about mainly because of the positive impact of market value adjustments (xVA), a higher result from derivatives used for asset/liability management purposes and higher dealing room income. The year-on-year increase was due mainly to a higher result from derivatives used for asset/liability management purposes and the positive impact of market value adjustments, partly offset by lower dealing room income.

The **other remaining income items** included dividend income of 15 million euros, down 27 million euros on the previous quarter since the bulk of dividend income is traditionally received in the second quarter, and net other income of 40 million euros, below its normal run rate of 50 million euros.

Operating expenses excluding bank and insurance taxes: 1 246 million euros

+3% quarter-on-quarter and +9% year-on-year (+6% year-on-year on an organic basis)

Operating expenses excluding bank and insurance taxes amounted to 1 246 million euros in the quarter under review, up 3% on their level in the previous quarter and 9% year-on-year (6% year-on-year on an organic basis). The quarter-on-quarter increase was due to higher staff costs, ICT expenses and depreciation charges, and offset only to a small extent by lower facilities costs, marketing costs and professional fees, among other things. The year-on-year increase was driven by higher staff costs, ICT expenses, depreciation charges and some smaller items.

Like-for-like (excluding forex effects, recent acquisitions and the one-off profit bonus for employees), operating expenses excluding bank and insurance taxes rose by 3.7% year-on-year in the first nine months of 2026, only slightly higher than our 3.4% guidance due to timing differences. As such, our organic 3.4% year-on-year guidance remains still valid. For further guidance regarding expected operating expenses in 2026 and the years to come, please refer to the 'Our guidance' section.

Bank and insurance taxes in the quarter under review amounted to 59 million euros, compared to 64 million euros recorded in the previous quarter and 49 million euros in the year-earlier quarter.

When certain non-operating items are excluded and bank and insurance taxes are spread evenly throughout the year, the cost/income ratio for the first nine months of 2026 amounted to 43%, compared to 46% for full-year 2025. When excluding all bank and insurance taxes, the cost/income ratio amounted to 40%, compared to 41% for full-year 2025.

Loan loss impairment: 114-million-euro net charge

versus a 66-million-euro net charge in the previous quarter and a 45-million-euro net charge in the year-earlier quarter

In the quarter under review, we recorded a 114-million-euro net **loan loss impairment** charge, compared to a net charge of 66 million euros in the previous quarter and 45 million euros in the year-earlier quarter. Excluding recent acquisitions, net loan loss impairment charges amounted to 102 million euros in the quarter under review.

The 114-million-euro net charge in the quarter under review included:

- A 103-million-euro impairment charge related to the loan book, up on the 53 million euros recorded in the previous quarter. This was due mainly to two corporate files in Belgium and to 365.bank (13 million euros, up from 9 million euros in the previous quarter)
- An 11-million-euro increase in the reserve for geopolitical and macroeconomic uncertainties, compared to an increase of 13 million euros in the previous quarter (see also the risk statement below and Note 3.9 in the financial statements of the quarterly report). Consequently, the remaining reserve for geopolitical and macroeconomic uncertainties amounted to 198 million euros at the end of September 2026.

The resulting **credit cost ratio** came to 0.12% for the first nine months of 2026 (excluding the changes in the reserve for geopolitical and macroeconomic uncertainties, as well as the acquisition of 365.bank) compared to 0.13% for full-year 2025. Including the reserve for geopolitical and macroeconomic uncertainties and 365.bank, the credit cost ratio amounted to 0.18% for the first nine months of 2026. At the end of September 2026, 1.8% of our total loan book was classified as impaired ('Stage 3'), the same level as at year-end 2025. Impaired loans that are more than 90 days past due amounted to 1.0% of the loan book, compared to 0.9% at year-end 2025.

For guidance regarding the expected credit cost ratio in 2026 and the years to come, please refer to the 'Our guidance' section.

Impairment charges on assets *other than loans* amounted to 24 million euros in the quarter under review, compared to 69 million euros in the previous quarter. The figure for the quarter under review mainly included impairment on software in Slovakia, whereas the previous quarter's figure had included impairment on software in Belgium and impairment related to modification losses in Hungary.

Net result by business unit

Belgium 714 million euros; Czech Rep. 252 million euros; International Markets 280 million euros; Group Centre -104 million euros

Belgium: the net result (714 million euros) was down 4% quarter-on-quarter, due to the combined effect of:

- Stable total income (mainly increased insurance revenues, trading and fair value income and net fee and commission income, offset by a decrease in net interest income from inflation-linked bonds and lower dividend income (seasonal drop))
- A slightly higher level of costs
- Higher insurance service expenses after reinsurance
- Higher impairment charges (increase in loan loss impairment due mainly to two corporate files, partially offset by a decrease in other impairment)

Czech Republic: the net result (252 million euros) was down 7% quarter-on-quarter, due to the combined effect of:

- Slightly higher total income (mainly increased insurance revenues and net fee and commission income, offset by lower trading and fair value income, net other income and net interest income (the latter entirely due to the one-off consolidation adjustment of -8 million euros mentioned above))
- A higher level of costs
- Higher insurance service expenses after reinsurance
- Slightly lower impairment charges

International Markets: the 280-million-euro net result breaks down as follows: 27 million euros in Slovakia (with the recent acquisitions in this country accounting for 6 million euros), 150 million euros in Hungary and 103 million euros in Bulgaria. For the business unit as a whole, the net result was up 17% quarter-on-quarter, due to the combined effect of:

- Higher total income (thanks mainly to higher net interest income, insurance revenues and trading and fair value income)
- A higher level of costs
- Slightly higher insurance service expenses after reinsurance
- Lower impairment charges (the previous quarter had been impacted by significant modification losses related to the lifetime extension of the mortgage interest cap in Hungary)

Group Centre: the net result (-104 million euros) was 2 million euros less negative quarter-on-quarter, due to:

- A stable level of (negative) total income
- Slightly higher costs
- Slightly lower insurance service expenses after reinsurance
- A slightly lower release of impairments

A full results table is provided in the 'Additional information' section of the quarterly report. A short analysis of the results per business unit is provided in the analyst presentation (available at www.kbc.com).

	Belgium		Czech Republic		International Markets	
Selected ratios by business unit	**9M2026**	**FY2025**	**9M2026**	**FY2025**	**9M2026**	**FY2025**

- excluding the reserve for geopolitical and macroeconomic uncertainties and the recent acquisition of 365.bank	0.13%	0.15%	0.06%	0.07%	0.19%	0.16%
- including the reserve for geopolitical and macroeconomic uncertainties and the recent acquisition of 365.bank	0.19%	0.13%	0.11%	0.10%	0.27%	0.18%
Impaired loans ratio	1.8%	1.8%	1.2%	1.3%	1.8%	1.7%

* Excluding windfall insurance taxes in Hungary, the combined ratio amounted to 87% for the first nine months of 2026 and 88% for full-year 2025.

Solvency and liquidity

Common equity ratio of 14.6%, LCR of 157%, NSFR of 131%

At the end of September 2026, **total equity** came to 28.9 billion euros and comprised 26.2 billion euros in parent shareholders' equity, 2.5 billion euros in additional tier-1 instruments and 0.1 billion euros in minority interests. Total equity was up 0.9 billion euros on its level at the end of 2025. This was due to the combined effect of:

- The inclusion of the profit for the first nine months of 2026 (+2.9 billion euros)
- The payment of the final dividend for 2025 in May 2026 and the interim dividend in November 2026 (-2.0 billion euros)
- Higher revaluation reserves (+0.1 billion euros)
- A number of smaller items

We have provided details of these changes under 'Consolidated statement of changes in equity' in the 'Consolidated financial statements' section of the quarterly report.

At the end of September 2026, our unfloored fully loaded **common equity ratio** (CET1) amounted to 14.6%, compared to 14.9% at year-end 2025 (however, when excluding the recent acquisitions of 365.bank and Business Lease – with a combined negative impact of approximately 50 basis points – our CET1 would have slightly increased in the year-to-date period under review). The solvency ratio for KBC Insurance under the Solvency II framework was 221% at the end of September 2026, compared to 227% at the end of 2025. We have provided more details on solvency under 'Solvency' in the 'Additional information' section of the quarterly report.

Our **liquidity position** also remained excellent, as reflected in an LCR ratio of 157% and an NSFR ratio of 131%, compared to 159% and 138%, respectively, at the end of 2025, well above the regulatory minima of 100%.

In line with our **dividend** policy, we have paid out an interim dividend of 1 euro on 6 November 2026 as an advance on the total dividend for financial year 2026.

Analysis of the year-to-date period (9M2026)

Net result for 9M2026: 2 851 million euros

up 11% year-on-year

Highlights (compared to the first nine months of 2025, unless otherwise stated):

- **Net interest income**: up 18% to 5 251 million euros. This was mainly attributable to the much higher commercial transformation result, a higher level of income from lending activities, higher interest income related to inflation-linked bonds, higher interest income from the dealing room, ALM and short-term cash management activities, lower costs related to the minimum required reserves held with central banks and higher interest income on customer term deposits, partly offset by higher wholesale funding costs. The volume of customer loans rose by 7% on an organic basis. Hence, organic year-to-date loan growth has now already surpassed our full-year 2026 guidance. Customer deposits (excluding KBC Bank's foreign branches) increased by 3% year-on-year on an organic basis. The net interest margin in the first nine months of 2026 came to 2.19%, up 13 basis points year-on-year.
- **Insurance service result** (insurance revenues before reinsurance - insurance service expenses before reinsurance + net result from reinsurance contracts held): up 11% to 499 million euros (315 million euros for non-life insurance and 184 million euros for life insurance). The non-life combined ratio for the first nine months of 2026 amounted to 87%, the same as for full-year 2025. Non-life insurance sales (gross written premiums) were up 9% to 2 302 million euros, with increases in all the main insurance classes, while life insurance sales were up 11% to 2 775 million euros, thanks to higher sales of unit-linked and guaranteed-interest life insurance products, while sales of hybrid products fell somewhat.
- **Net fee and commission income**: up 10% to 2 261 million euros. This was mainly attributable to higher fees for asset management services and, to a lesser extent, higher fees for banking services (increased fee income for payment services, credits and securities services, partly offset by SRT-related coupon expenses, higher distribution fees paid for bank products and lower network income, among other factors). At the end of September 2026, total assets under management were up 13% to 330 billion euros due to a combination of net inflows (+4 percentage points) and the effect of a positive year-on-year market performance (+9 percentage points).
- **Trading & fair value income and insurance finance income and expense**: down 96 million euros to -237 million euros. This was due to lower dealing room income and more negative insurance finance income and expense (due to strong growth in insurance), partly offset by a higher result from derivatives used for asset/liability management purposes and higher positive market value adjustments (xVA).
- **All other income items combined**: more or less stable at 247 million euros, with the increase in dividend income being offset by a decrease in net other income.
- **Operating expenses excluding bank and insurance taxes:** up 9% to 3 670 million euros, attributable to higher staff costs (due in part to wage drift and an exceptional bonus for staff related to the excellent results for 2025), higher costs related to ICT and depreciation, and some smaller items. Like-for-like (excluding forex effects, recent acquisitions and the exceptional bonus for staff), operating expenses rose by 3.7%, only slightly higher than our 3.4% guidance due to timing differences. As such, our organic 3.4% year-on-year guidance remains still valid. Bank and insurance taxes amounted to 671 million euros, up 9% year-on-year, due in part to higher national levies (mainly in Hungary and Belgium), though partly offset by a lower contribution to the deposit guarantee schemes (in Belgium). The cost/income ratio for the first nine months of 2026 amounted to 43% when certain non-operating items are excluded and bank and insurance taxes are spread evenly throughout the year (46% for full-year 2025). When bank and insurance taxes are fully excluded, the cost-income ratio for the period under review amounted to 40% (41% for full-year 2025).
- **Loan loss impairment**: net charge of 345 million euros, compared to a net charge of 200 million euros in the reference period. The first nine months of 2026 included a charge of 246 million euros for the loan book and an increase of 99 million euros in the reserve for geopolitical and macroeconomic uncertainties (compared to a charge of 214 million euros and a release of 14 million euros, respectively, in the reference period). As a result, the credit cost ratio came to 0.12% for the first nine months of 2026 when the changes in the reserve for geopolitical and macroeconomic uncertainties, as well as the recently acquired 365.bank, are excluded. When they are included, the credit cost ratio amounted to 0.18% for the first nine months of 2026. Impairment charges on assets other than loans amounted to 94 million euros (mainly impairment on software and impairment related to modification losses for the lifetime extension of the mortgage interest cap in Hungary), compared to 13 million euros in the reference period.
- **The 2 851-million-euro net result for the first nine months of 2026** breaks down as follows:
  - 1 778 million euros for the Belgium Business Unit, up 301 million euros on its year-earlier level
  - 746 million euros for the Czech Republic Business Unit, up 55 million euros
  - 619 million euros for the International Markets Business Unit, up 11 million euros. Excluding the significant windfall bank and insurance taxes and the impairment on modification losses in Hungary, the net result would have even been 124 million euros higher
  - -292 million euros for the Group Centre, down 81 million euros, attributable mainly to a combination of lower total income (due, among other things, to SRT-related coupon expenses) combined with higher costs

ESG developments, risk statement and economic views

ESG developments

Together with our customers, employees and other stakeholders, we continue to make progress on our sustainability ambitions and remain committed to transparent and consistent communication about our sustainability efforts. We do so through a separate Sustainability Statement in our annual report, as well as through a voluntary Sustainability Report. Both publications are available at www.kbc.com.

Our efforts do not go unnoticed either. Our S&P ESG score has risen again compared to last year, confirming our continued progress on environmental, social and governance issues. In October, the Belgian Institute of Registered Auditors (IBR) announced that KBC will receive a Lifetime Sustainability Award as part of the Belgian Awards for Sustainability Reports. We appreciate this clear recognition of our long-standing commitment to sustainability reporting and transparency.

Risk statement

As we are mainly active in banking, insurance and asset management, we are exposed to a number of typical risks for these financial sectors such as – but not limited to – credit default risk, counterparty credit risk, concentration risk, movements in interest rates, currency risk, market risk, liquidity and funding risk, insurance underwriting risk, changes in regulations, operational risk, customer litigation, competition from other and new players, as well as the economy in general. KBC closely monitors and manages each of these risks within a strict risk management framework, but they may all have a negative impact on asset values or could generate additional charges beyond anticipated levels.

At present, a number of factors are considered to constitute the main challenges for the financial sector. These stem primarily from geopolitical risks which have increased significantly over the past few years, including the war in Ukraine, conflicts in the Middle East (see next paragraph), trade wars as a consequence of US tariff policies and, more generally, increasing tensions between the US and Europe. These risks result or may result in shocks for the global economic system (e.g., GDP and inflation) and the financial markets (including interest rates). European economies, including KBC's home markets, are affected too, creating an uncertain business environment, including for financial institutions. Government budgets across Europe and beyond are under pressure. In the past few months, this has resulted in higher spreads on government debt, with France in particular being in the spotlight. In response to their weak budgetary situation and challenging economic conditions, we have seen governments across Europe taking additional measures to support their budgets (via increased tax contributions from the financial sector), their citizens and corporate sector (by, for instance, implementing interest rate caps on loans or by pushing for higher rates on savings accounts). Regulatory and compliance risks – for example in relation to capital requirements, anti-money laundering regulations, GDPR and ESG/sustainability – also remain a dominant theme for the sector, as does enhanced consumer protection. Digitalisation (with technology, including AI, as a catalyst) presents both opportunities and threats to the business model of traditional financial institutions, while climate and environmental-related risks are becoming increasingly prevalent. Cyber risk has become one of the main threats during the past few years, not just for the financial sector, but for the economy as a whole. This is partly driven by geopolitical tensions (state-sponsored cyberattacks), but is also increasingly supported by new technologies, such as recent developments surrounding several frontier AI companies which enable AI-driven vulnerability discovery. KBC has already taken necessary actions to increase vigilance and capacity to process a certain upcoming increase of zero day vulnerabilities.

Besides the ongoing war in Ukraine, recent months have been dominated by an armed conflict between the United States, Israel and Iran that began in late February 2026. The conflict has resulted in regional and increasingly global instability, disrupting trade routes and supply chains, especially in energy and other fossil-fuel-related markets, and causing significant volatility on financial markets. Financial conditions have tightened, at times putting pressure on funding markets. As a consequence, global and European economic growth projections have been revised downwards, while inflation expectations have moved higher. This has also increased uncertainty about the future path of interest rates, which have already risen in recent months. KBC's direct exposure to the Middle East region is very limited. Nevertheless, KBC is closely monitoring the macroeconomic impact of the conflict and potential spillover effects for the group and its customers, both financially and operationally, with particular attention being paid to energy-related and energy-sensitive sectors and counterparties. Geopolitically driven cyber threats are an additional point of attention, including heightened threats directed at large US-based technology companies, which play an important role as suppliers of critical digital infrastructure to the financial sector, including KBC.

We provide risk management data in our annual reports, quarterly reports and dedicated risk reports, all of which are available at www.kbc.com.

Our view on economic growth, interest rates and foreign exchange rates

The third quarter of 2026 was again dominated by global geopolitical events, further rising energy prices and by increased European political and social tensions. US economic activity grew by 0.8% (non-annualised) in the third quarter, somewhat stronger than in the second quarter. Domestic economic growth and especially (AI-related) business investment growth remained solid.

Third quarter growth in the euro area economy (0.4%) remained resilient, but was weaker than in the second quarter (0.6%). Growth in our core countries of Belgium, the Czech Republic, Hungary, Slovakia and Bulgaria amounted to 0.3%, 0.5%, 0.1%, 0.0% (estimate) and 0.7% (estimate), respectively. Overall, growth in the euro area and our core markets is expected to remain relatively subdued in 2026, but nevertheless resilient in the face of high energy prices and economic and political uncertainty.

In the euro area, headline and core inflation in October rose to 4% and 2.5%, respectively. Due to the ongoing conflict in the Middle East and the approaching winter season, energy prices have risen further, but have eased somewhat after the US mid-term elections. Amidst a broadening of underlying inflation pressures, the ECB raised its deposit rate in September by 25 basis points to 2.50% and kept it unchanged at its policy meeting of October, with a clear hint that a rate hike in December is very likely in the light of still present upward inflation risks. We also expect another rate hike by 25 basis points in December.

The Fed also raised its policy rate in September by 25 basis points to 3.875% and kept it unchanged in October. We expect another rate hike to 4.125% by the end of the fourth quarter, due to persistent above-target inflation in the context of strong domestic growth.

Since the start of the third quarter, US and German 10-year yields rose on balance by about 55 and 45 basis points respectively. The upward trend was attributable mainly to persistent inflationary pressure and the tightening policy stances of central banks, as well as to market concern about public finances and the large financing needs of (AI-related) investments. Elevated risks and uncertainty caused substantial volatility mainly in US long-term yields, and more recently, a flight to safety towards US and German bonds. In Europe, political and fiscal risks caused a sizeable increase of intra-EMU sovereign spreads.

The Czech National Bank raised its policy rate in early November to 4%. We expect the Czech koruna to remain broadly stable in the coming quarters.

In August 2026, the Hungarian central bank cut its policy rate to 5.50%. A still restrictive monetary policy and strong Hungarian forint will reinforce the disinflationary trend. Moreover, the central bank announced in September that it was lowering its inflation target from 3% to 2.5% (maintaining the 1 percentage point tolerance band) from January 2028 on.

Our guidance

Guidance for full-year 2026
(as provided with the 2Q2026 results)

Guidance for full-year 2026*	
Total income	approx.+11.0% y-o-y
Net interest income	approx. 7.05 billion euros
Organic loan volume growth	at least +6% y-o-y
Insurance revenues (before reinsurance)	approx. +9.0% y-o-y
Operating expenses (excl. bank and insurance taxes)	approx. +7.7% y-o-y* (approx. +3.4% y-o-y* organically)
Cost/income ratio (excl. bank and insurance taxes, but including insurance commissions paid)	approx. 40%
Combined ratio for non-life insurance	below 91%
Credit cost ratio	well below 25-30 basis points

* This does not include the one-off 23-million-euro profit bonus for staff.

Medium to long-term guidance
(as provided with the 4Q2025 results)

Guidance for full-year 2028	
Total income	CAGR (2025-2028) at least +7.7%
Net interest income	CAGR (2025-2028) at least +8.6%
Insurance revenues (before reinsurance)	CAGR (2025-2028) at least +7.5%
Operating expenses (excl. bank and insurance taxes)	CAGR (2025-2028) below +4.3%
Cost/income ratio (excl. bank and insurance taxes, but including insurance commissions paid)	below 38%
Combined ratio for non-life insurance	below 91%
Credit cost ratio	well below 25-30 basis points

Dividend and capital deployment policy (as provided with the 1Q2025 results)

- **Dividend policy**:
  - Payout ratio (including AT1 coupon) between 50% and 65% of consolidated profit of the accounting year
  - Interim dividend of 1 euro per share in November of each accounting year as an advance on the total dividend
- **Capital deployment policy**:
  - We aim to remain amongst the better capitalised financial institutions in Europe
  - Each year (when announcing the full-year results), the Board of Directors will take a decision, at its discretion, on the capital deployment. The focus will predominantly be on further organic growth and M&A
  - We see a 13% unfloored fully loaded common equity ratio as the minimum
  - We will fill up the AT1 and Tier 2 buckets within P2R and use SRTs (Significant Risk Transfers) as a part of a risk-weighted assets optimisation programme

The largest movements in other comprehensive income (9M 2026 and 9M 2025):

- Net change in revaluation reserve (FVOCI debt instruments): the -486 million euros in 9M 2026 is mainly explained by the increase in interest rates (mainly in 3Q 2026), partly compensated by the unwinding effect of the negative outstanding revaluation reserve and hedge accounting. The -21 million euros in 9M 2025 is mainly explained by slightly higher interest rates chiefly in government bonds in most countries, partly compensated by the unwinding effect of the negative outstanding revaluation reserve.
- Net change in hedging reserve (cash flow hedge): the +191 million euros in 9M 2026 can for a large part be explained by the positive MtM impact on payer swap positions (due to increased long-term interest rates in 3Q 2026), partly offset by negative MtM on receiver swap positions. The +324 million euros in 9M 2025 can for a large part be explained by the positive MtM on the net payer swaps position due to higher long-term interest rates in combination with the unwinding effect of the negative outstanding cash flow hedge reserve.
- Foreign operations - foreign currency translation difference: the +84 million euros in 9M 2026 was mainly caused by the appreciation of the HUF and the USD versus the EUR. The change in the hedge of net investments in foreign operations of -25 million euros in 9M 2026 was also mainly caused by the above-mentioned FX rate change versus the EUR. The +231 million euros in 9M 2025 was mainly caused by the appreciation of the CZK and HUF versus the EUR, partly offset by the depreciation of the USD versus the EUR. The change in the hedge of net investments in foreign operations of -45 million euros in 9M 2025 was also mainly caused by the above-mentioned FX rate changes versus the EUR. The hedging policy of FX participations aims to stabilize the group capital ratio (and not parent shareholders' equity).
- The net changes in net insurance finance income and expense from (re)insurance contracts issued and held of +154 million euros in 9M 2026 is mainly explained by the increase of risk free interest rates, partly offset by the unwinding effect. The +358 million euros in 9M 2025 is mainly explained by the EUR long-term risk free interest rate increase.
- Net change in revaluation reserve (FVOCI equity instruments): the +167 million euros in 9M 2026 is mainly explained by the positive fair value movements driven by higher stock markets. The -6 million euros in 9M 2025 is mainly explained by slightly lower revaluations of non-quoted shares.
- Remeasurement of defined benefit liability: the +59 million euros in 9M 2026 is mainly explained by the higher discount curve and the positive return of the plan assets, partly offset by the effect of the higher expected inflation rate and a negative experience result. The -19 million euros in 9M 2025 is mainly explained by the effect of the negative return of the plan assets, the negative experience result and the higher expected inflation rate, largely compensated by the higher discount rate applied on the obligations.

- The impact of the most important acquisitions and disposals made in 2025 and 2026 is set out in Note 6.6.
- The increase of total assets in 9M 2026 can for the largest part be explained by the increase of loans and advances to customers and higher bond portfolio (both supported by the acquisition of 365.bank, see Note 6.6), partly offset by lower cash and cash balances with central banks.
- The increase of the total liabilities in 9M 2026 can for the largest part be explained by higher customer deposits (also supported by the acquisition of 365.bank) and higher deposits from credit institutions, partly offset by lower repos.

9M 2026

- The Annual General Meeting of shareholders on 7 May 2026 approved a final gross dividend of 5.10 euros per share related to the accounting year 2025, of which:
    - an interim dividend of 1.00 euro per share (397 million euros in total), as decided by KBC Group's Board of Directors of 6 August 2025 and paid on 7 November 2025 (was deducted from retained earnings in 3Q 2025)
    - a final ordinary dividend of 4.10 euros per share and paid on 20 May 2026 (1 626 million euros in total), which was deducted from retained earnings in 2Q 2026.
- In line with our general dividend policy, the Board of Directors decided on the 5th of August 2026 to pay out an interim dividend of 1 euro per share (397 million euros in total) in November 2026 as an advance on the total dividend for financial year 2026 (deducted from retained earnings in 3Q 2026 and included in Other liabilities).
- Restatement related to previous years' relates to a consolidation adjustment to intercompany transactions within the Czech Republic. Given the relatively limited impact, the comparative balance sheet and income statement have not been restated.
- Transfer from revaluation reserves to retained earnings on realization: the 258 million euros includes the higher than average realization of fair value reserves on FVOCI equity instruments in 3Q 2026 for about 200 million euros related to sales within the listed equity portfolio at KBC Insurance (of which roughly 2/3rd related to fair value reserves already existing at 31 December 2025).

2025

- The 'Dividends' item in 2025 (1 646 million euros) includes the final dividend 2024 of 3.15 euros per share (1 249 million euros in total, paid in May 2025), and the interim dividend of 1.00 euro per share (397 million euros in total, paid in November 2025).
- Issue/repurchase of AT1 included in equity: on 27 May 2025, KBC Group NV issued 1 billion euros in AT1 Securities. The outstanding 364 million of the AT1 securities issued in April 2018 has been called on 24 October 2025.

- The net cash from operating activities in 9M 2026 mainly includes an increase in loans and advances to customers, higher debt securities, the repayment of certificates of deposit and lower repos, partly offset by the result before tax and higher customer deposits. The net cash from operating activities in 9M 2025 mainly includes an increase in loans and advances to customers (mainly mortgage and term loans), new investments in debt securities at FVOCI and a decrease in time deposits, savings certificates and repo's, partly compensated by the result before tax, higher savings accounts and certificates of deposit.
- The net cash from (used in) investing activities in 9M 2026 mainly includes additional net purchases of debt securities at amortised cost and the acquisitions of subsidiaries. The net cash from (used in) investing activities in 9M 2025 mainly includes additional net purchases of debt securities at amortised cost.
- The net cash flow from financing activities in 9M 2026 mainly includes the issuance of non-convertible bonds (including covered bonds for 2 250 million euros) and subordinated liabilities, offset by the dividend payment and the repayment of non-convertible bonds (including 1 750 million euros covered bonds) and subordinated liabilities. The net cash flow from financing activities in 9M 2025 mainly includes the dividend payment, the repayment of senior holdco, of subordinated loans and of other smaller debt securities partly offset by the issuance of new subordinated loans, new AT1 instrument (net proceeds 996 million euros) and new senior holdco (1 250 million euros and 1 000 million USD).

Notes on the accounting policies

Statement of compliance (note 1.1 in the annual accounts 2025)

The condensed interim financial statements of the KBC Group for the period ended 30 September 2026 have been prepared in accordance with IAS 34, 'Interim financial reporting' . The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended 31 December 2025, which have been prepared in accordance with the IFRS Accounting Standards as adopted by the European Union ('endorsed IFRS').

The following IFRS standards became effective on 1 January 2026:

- Several limited amendments to IFRS 9 and 7, with limited disclosure impact for KBC.
- Several limited amendments to other existing IFRS standards, without impact for KBC.

The following IFRS standards were issued and will become effective on 1 January 2027. KBC will apply these standards when they become mandatory:

- IFRS 18 Presentation and Disclosure in Financial Statements, mainly limited presentation impact expected.
- IFRS 19 Subsidiaries without public accountability, no impact expected.

The IASB published limited amendments to IAS 21 which will become effective on 1 January 2027, without impact for KBC.

Summary of significant accounting policies (note 1.2 in the annual accounts 2025)

A summary of the main accounting policies is provided in the group's annual accounts as at 31 December 2025.

Main exchange rates used:

	Exchange rate at 30-09-2026		Average exchange rate in 9M 2026	
	1 EUR = … … currency	Changes relative to 31-12-2025 Positive: appreciation relative to EUR Negative: depreciation relative to EUR	1 EUR = … … currency	Changes relative to the average 9M 2025 Positive: appreciation relative to EUR Negative: depreciation relative to EUR
CZK	24.440	-1%	24.296	2%
HUF	366.20	5%	369.04	9%

Notes on segment reporting

Segment reporting according to the management structure of the group (note 2.2 in the annual accounts 2025)

For a description on the management structure and linked reporting presentation, reference is made to Note 2.1 in the annual accounts 2025.

Net interest expense relating to defined benefit plans	7	6	2	2	2

The interest income on financial instruments calculated using the effective interest rate method – other, is mainly related to interest income on cash balances with central banks. These cash and cash balances are mainly funded with short term liabilities, such as certificates of deposit and repos. The interest expense related to this funding is part of interest expense on financial liabilities at AC. Net interest margin on this activity is narrow, resulting in limited net interest income.

The impact on net interest income of central banks' Minimum Reserve Requirements (MRR) (and their remuneration on these deposits) was about -36 million euros in 3Q 2026, compared to -33 million euros in 2Q 2026 and -38 million euros in 3Q 2025 (-101 million euros in 9M 2026 and -125 million euros in 9M 2025). The decrease in 9M 2026 is mainly due to the Euro adoption in Bulgaria, partly offset by the impact of policy rate hikes by the ECB and CNB.

Net result from financial instruments at fair value through profit or loss and Insurance finance income and expense (for insurance contracts issued) (note 3.3 in the annual accounts 2025)

(in millions of EUR)	9M 2026	9M 2025	3Q 2026	2Q 2026	3Q 2025
Total	- 237	- 141	- 27	- 92	- 62
Breakdown by driver					
Dealing room income	84	190	33	22	53
MTM ALM derivatives and other	- 119	- 132	- 19	- 29	- 51
Market value adjustments (xVA)	32	3	41	- 8	5
Result on investment backing UL contracts - under IFRS 17 & Insurance finance income and expense	- 234	- 202	- 81	- 77	- 69

The result from financial instruments at fair value through profit or loss and Insurance finance income and expenses in 3Q 2026 is 65 million euros less negative compared to 2Q 2026.

- The quarter-on-quarter evolution is explained as follows:
  - Strong positive impact from market value adjustments (xVA) in 3Q 2026 compared to slightly negative impact in 2Q 2026, mainly the result of increased interest rates and increased KBC funding spreads, partly offset by increased counterparty credit spreads.
  - Higher dealing room income in Belgium and Hungary, partly offset by a decrease in the Czech Republic.
  - Less negative MTM ALM derivatives and other income in 3Q 2026, compared to 2Q 2026, mainly driven by increased interest rates, partly offset by the negative impact of hedge accounting ineffectiveness.

- Partly offset by
  - Slightly more negative result on investments backing unit-linked contracts under IFRS 17 & Insurance finance income and expense, due to increased interest accretion (strong growth in insurance portfolio).

The result from financial instruments at fair value through profit or loss and Insurance finance income and expenses in 9M 2026 is 96 million euros more negative compared to 9M 2025.

- The year-on-year evolution is for a large part explained by:
  - Lower dealing room income, mainly in Belgium
  - More negative result on investments backing unit-linked contracts under IFRS 17 & Insurance finance income and expense, due to increased interest accretion on the strong growing insurance portfolio

- Partly compensated by
  - Less negative MTM ALM derivatives and other income.
  - More positive impact from market value adjustments (xVA)

Expenses from Groep VAB	- 127	- 108	- 46	- 45	- 45

Special items in 9M 2026:

- Legal case in Hungary (+29 million euros in 1Q 2026) (unused amount reversed of the created provision in 4Q 2024).
- Acquisition of Business Lease Czech Republic and Slovakia (+7 million euros net in each quarter of 2026, consisting of +99 million euros income from operating leasing activities and -78 million euros expenses from operating activities in 9M 2026). For more information, see Note 6.6.
- Realized loss on sale of low yielding bonds at amortised cost and FVOCI mainly in Belgium and the Group Centre (total -17 million euros).

Special items in 9M 2025:

- Net other income was higher than the normal run rate of 50 million euros per quarter both in 1Q and 2Q 2025 due mainly to higher-than-average gains on the sale of real estate.
- Realized loss on sale of low yielding bonds at amortised cost and FVOCI mainly in Belgium and the Czech Republic (total -24 million euros).

Breakdown of the insurance results (note 3.6 in the annual accounts 2025)

The table below includes intragroup transactions between bank and insurance entities (the results for insurance contracts concluded between the group's bank and insurance entities, interest that insurance companies receive on their deposits with bank entities, distribution commissions intra-group…) in order to give a more accurate view of the profitability of the insurance business.

The non-technical account includes also results of non-insurance companies such as VAB group and ADD.

The column 'of which life direct participating (VFA)' relates to results of long-term unit-linked contracts in Central and Eastern Europe.

Total insurance finance income and expenses before reinsurance includes changes in fair value of underlying assets of contracts measured under VFA, which represents the fair value movement of unit-linked liabilities, valued under IFRS 17 (variable fee approach), with the offsetting impact in fair value movement of underlying unit-linked assets in net result from financial instruments at fair value through profit or loss (see also Note 3.3, result on investment backing UL contracts - under IFRS 17).

Amounts recoverable from reinsurer for Life also contains profit sharing (if any).

The insurance service expenses Non-life in 9M 2026 are impacted by 133 million euros higher claim related expenses including industrial fires (mainly in the Czech Republic and to a lesser extent in Belgium and Slovakia), hailstorms in Belgium and Slovakia, and reserve updates for the future expected impact of the indicative tables, partly compensated by positive parameter updates in Belgium. These higher claim related expenses are partly compensated by higher amounts recoverable from reinsurance (+28 million euros versus 9M 2025).

Operating expenses – income statement (note 3.7 in the annual accounts 2025)

The total Operating expenses by nature include also Opex allocated to insurance service expenses (directly attributable from insurance) in order to provide a comprehensive overview of the total cost evolution.

Depreciation and amortisation of fixed assets	- 343	- 297	- 116	- 115	- 99

- The operating expenses for 3Q 2026 include -59 million euros related to bank and insurance levies (-64 million euros in 2Q 2026, -49 million euros in 3Q 2025). Application of IFRIC 21 (Levies) has as a consequence that the majority of the levies are taken upfront in expense of the first quarter of the year.
- The increase of bank and insurance tax in 9M 2026 compared to 9M 2025 is primarily driven by higher national taxes in most countries (mainly in Belgium and Hungary), partly compensated by lower Deposit Guarantee Scheme contribution in Belgium.
- The staff expenses in 9M 2026 include a -23 million euros one-off profit bonus (booked in 1Q 2026).

- The impairment on financial assets at AC and at FVOCI in 9M 2026 include:
    - A net impairment charge for the geopolitical and macroeconomic uncertainties (ECL and management overlay) of 99 million euros (11 million euros in 3Q 2026, 13 million euros in 2Q 2026 and 75 million euros in 1Q 2026), compared to a net impaiment release of 14 million euros in 9M 2025 (9 million euros release in 3Q 2025, 40 million euros charge in 2Q 2025 and 45 million euros release in 1Q 2025).

      The outstanding reserve for the geopolitical and macroeconomic uncertainties (ECL and management overlay) amounts to 198 million euros at 30 September 2026. This is predominantly driven by the management overlay in combination with sectors deemed to have incurred an increase in credit risk because they are either exposed to macroeconomic risks (e.g. high(er) inflation, high(er) interest rates, high(er) energy prices, …) or indirectly exposed to military conflicts, such as the one in Ukraine and Iran. For more information on the impact of the armed conflict in Iran, see the Risk Statement on page 10.
    - Additionally, the impairments on financial assets at AC and at FVOCI in 9M 2026 include 246 million euros net charge (103 million euros in 3Q 2026, 53 million euros in 2Q 2026 and 89 million euros in 1Q 2026), compared to 214 million euros net charge in 9M 2025 (55 million in 3Q 2025, 76 million euros in 2Q 2025 and 83 million euros in 1Q 2025), both for a large part in stage 3 mainly for a limited number of corporate files in most countries. The impairments on financial assets at AC and at FVOCI in 9M 2026 include a 16-million-euros impairment charge reducing the backstop shortfall for non-performing loans (booked in 1Q 2026), mainly in Belgium (compared to a 26-million-euros charge in 9M 2025).
- 9M 2026 include a 51-million-euros impairment charge on intangible assets (other than goodwill), mainly related to software impairments in Belgium and Slovakia (compared to a 5-million-euros charge in 9M 2025, also related to software impairments).
- The impairment on other (Other) in 9M 2026 amount to a 43-million-euros impairment charge, compared to a 7-million-euros charge in 9M 2025, both almost fully booked in 2Q, both mainly related to modification losses, following the extension of the interest cap regulation for mortgages in Hungary (and for 9M 2025 additionally to the mortgage loan support scheme in Slovakia). As of 2Q 2026, the legislation in force no longer contained an expiry date, implying that the cap would remain in place for the remaining contractual life of the affected loans. Although the new Hungarian government had announced its intention to phase out the measure, no change in the legislation has been enacted so far. Consequently, K&H Bank reflected the resulting reduction in expected future interest cash flows through a lifetime modification loss in 2Q 2026 (a 42-million-euros impairment charge).

More information on the acquisition of 365.bank and Business Lease (BL) CZ and SK in 1Q 2026 is provided in Note 6.6.

Non-convertible bonds in 2026 also include new credit-linked notes issued by KBC in June 2026 (100 million euros), after a first issue in 2025 (273 million euros): in line with the capital deployment policy of KBC and the strategy to optimise RWA in order to strengthen the capital ratio and support further growth, KBC has successfully completed in 2Q 2026 a second significant risk transfer transaction covering first loss exposure on a 1.25 billion euros corporate loan portfolio. This transaction has led to a risk-weighted assets saving of approximately 0.7 billion euros and as such strengthens the unfloored fully loaded CET1 ratio of KBC Group by approximately 7 basis points as of the second quarter of 2026.

(*) The carrying value after impairment in this note is equal to the sum of the lines Loans and advances to credit institutions (excl. reverse repos), Loans and advances to customers (excl. reverse repos) and Reverse repos in note 4.1 (in the column Measured at amortised cost)

Acquisition of 365.bank: the carrying value before impairment at 30 September 2026 includes 4.4 billion euros for 365.bank, of which 3.6 billion euros in loans and advances, 0.7 billion euros in debt securities at amortised cost and 0.1 billion euros in debt securities at fair value through OCI. The impairments at 30 September 2026 amounted to 162 million euros for 365.bank.

Financial assets and liabilities not measured at fair value – fair value (note 4.4 in the annual accounts 2025)

Fair value of financial assets and liabilities that are not measured at fair value in the balance sheet	30-09-2026		31-12-2025	
(in millions of EUR)	Carrying value	Fair value	Carrying value	Fair value
Total financial assets at amortised cost adjusted for FV portfolio hedge	312 186	304 129	293 744	288 544
Of which debt securities	54 397	52 086	51 752	50 267
Total financial liabilities at amortised cost	332 800	332 305	324 714	324 897

- The negative difference between the fair value and the carrying value of debt securities measured at amortised cost increased from 1.5 billion euros at 31 December 2025 to 2.3 billion euros at 30 September 2026 at the level of KBC Group. This 0.8 billion euros deterioration was mainly attributable to increasing interest rates in 3Q 2026, partly compensated by the unwinding effect and hedge accounting.
- Similarly, the negative difference between the fair value and the carrying value of the remaining financial assets measured at amortised cost increased by 2.0 billion euros, from 3.7 billion euros to 5.7 billion euros, primarily for the same reasons. As a hold-to-collect business model is applied on assets at amortised cost, interim changes in fair value are less relevant.
- The positive difference between the fair value and the carrying value of total financial liabilities measured at amortised cost of 0.2 billion euros at 31 December 2025 has become a negative difference of 0.5 billion euros at 30 September 2026. This evolution mainly reflects the impact of increasing interest rates, and to a lesser extent the unwinding effect and a modest increase in KBC's credit spread. Note that the fair value of demand and savings deposits is presumed to be equal to their carrying value.

Financial assets and liabilities measured at fair value – fair value hierarchy (note 4.5 in the annual accounts 2025)

For more details on how KBC defines and determines (i) fair value and the fair value hierarchy and (ii) level 3 valuations reference is made to notes 4.4 up to and including 4.7 of the annual accounts 2025.

Financial assets and liabilities measured at fair value – transfers between level 1 and 2 (note 4.6 in the annual accounts 2025)

During 9M 2026, KBC transferred about 339 million euros worth of financial assets and liabilities out of level 1 and into level 2. It also reclassified approximately 430 million euros worth of financial assets and liabilities from level 2 to level 1. Most of these reclassifications were carried out due to a change in the liquidity of government and corporate bonds.

Financial assets and liabilities measured at fair value – focus on level 3 (note 4.7 in the annual accounts 2025)

In 9M 2026 significant movements in financial assets and liabilities classified in level 3 of the fair value hierarchy included the following:

- Financial assets measured at fair value through profit and loss (other than HFT): the fair value of loans and advances increased by 678 million euros, mostly due to new acquisitions, partly offset by deals that reached maturity. The fair value of debt securities increased by 120 million euros, mostly due to new acquisitions.
- Financial assets held for trading: the fair value of derivatives increased by 161 million euros, mostly due to changes in market parameters and new acquisitions, partly offset by sales of existing positions. The fair value of debt securities decreased by 580 million euros due to transfers out of level 3.
- Financial assets measured at fair value through other comprehensive income: the fair value of equity instruments increased by 46 million euros, mostly due to new acquisitions and changes in market parameters, partly offset by sales of existing positions. The fair value of debt securities increased by 22 million euros, mostly transfers into level 3.
- Financial liabilities held for trading: the fair value of derivatives increased by 162 million euros, mostly due to changes in market parameters and new acquisitions, partly offset by sales of existing positions.
- Financial liabilities designated at fair value: the fair value of debt securities issued increased by 63 million euros, mostly due to issuance of new debt securities, partly offset by deals that reached maturity and repurchase of existing debt securities.

Insurance contract liabilities (note 5.6 in the annual accounts 2025)

The Contractual Service Margin (CSM) as included in the insurance contract liabilities, evolved from 2 460 million euros at 31 December 2025 to 2 650 million euros at 30 September 2026, or an increase of 190 million euros. This increase is mainly attributable to CSM of new business (+166 million euros) which was higher compared to the CSM release in the income statement (-141 million euros), reinforced by an increase in positive experience variances and a change in non-economic parameters (+138 million euros), positive interest accretion (time value) on the CSM (+25 million euros) and FX impact (+2 million euros).

Details of provisions for other risks and charges (note 5.7.3 in the annual accounts 2025)

Possible outflow: on 6 October 2011, Irving H. Picard, trustee (the 'trustee') for the liquidation of Bernard L. Madoff Investments Securities LLC (& Bernard L. Madoff), sued KBC Investments Ltd (a full subsidiary of KBC Bank) before the bankruptcy court in New York to claw back approximately 110 million US dollars' worth of transfers made to KBC entities by Madoff (through a feeder fund that KBC had lent to Harley International). For more information, we refer to the annual report.

Currently, an investigation of the facts is still ongoing. The initial end date for this investigation (22 September 2025) was postponed several times. The parties will proceed with expert discovery in 4Q 2026, which will progress into 1Q 2027. Summary judgement motions are expected to be filed in the second half of 2027, and any trial is not anticipated to take place before 2028.

KBC believes it has good and credible defenses, including demonstrating its good faith. The procedure may still take several years.

- The ordinary shares of KBC Group NV have no nominal value and are quoted on Euronext Brussels.
- The treasury shares almost entirely relate to shares bought in the share buyback programme.

Main changes in the scope of consolidation (note 6.6 in the annual accounts 2025)

Purchase of 365.bank in Slovakia

- On 14 May 2025, J&T Finance Group SE, based in the Czech Republic and the majority shareholder of 365.bank a.s., and KBC Bank reached an agreement under which KBC acquires a 98.45% stake in 365.bank (in cash). The agreement was still subject to regulatory approval and was finalised on 15 January 2026.
- The transaction price was subject to limited adjustments on completion and finals at 708 million euros for 98.45% of the shares.
- KBC has recognized a goodwill for an amount of 176 million euros in 2026, taking into account fair value adjustments. These fair value adjustments include the recognition of other intangible assets for an amount of 91 million euros, mainly customer relationships, amortized over mostly 15 years. These customer relationships (related to core deposits, asset management and insurance customers) have mostly been calculated based on the Multi-Period Excess Earnings Methodology, whereby the projected future cash flows attributable to existing customers (after deducting contributory asset charges for the use of other necessary assets (such as workforce, IT, fixed assets) and after tax) are discounted to present value using the expected internal rate of return of the acquisition business plan. A Tax amortization benefit has been added to the calculation.
- The goodwill is justified by the quality of the acquired entity reflected in its qualitative loan portfolio and profitability (based on the results of recent years and the business plan for the coming years) and the professionalism of its employees. This allows KBC to expand its client base and thus benefit from economies of scale (through significant cost synergies related to the branch network and head office in Slovakia and revenue synergies including through increased sales of insurance products from ČSOB Poist'ovňa a.s.) and greater visibility. Goodwill is not deductible for tax purposes.
- 365.bank, a commercial bank in Slovakia, holds a 3.7% market share by assets as of December 2024 with a notable strength in retail banking. The combination of ČSOB and 365.bank establishes a strong banking group in Slovakia, whereby 365.bank's unique distribution model, supported by its long-standing partnership with Slovak Post, will allow KBC to significantly expand ČSOB's customer reach across Slovakia. The acquisition of 365.bank boosts the scale of mainly retail operations, commanding a market share of approximately 20% in retail mortgages and other customer loans. Based on the group's bank-insurance model, other entities of ČSOB will also benefit from the acquisition through the cross-selling of products and services to 365.bank's retail customers.
- As of 1 November 2026, 365.bank has been legally merged with ČSOB. Through this legal merger all activities of 365.bank will be transferred to ČSOB, and 365.bank ceased to exist as a separate legal entity.

Acquisition of Business Lease in the Czech Republic and Slovakia

- On 23 October 2025 Business Lease Group BV, part of AutoBinck Group NV and ČSOB Leasing Czech Republic and ČSOB Leasing Slovakia, both respective part of KBC Group's Czech and Slovak divisions announced the signing of a binding agreement for the acquisition of all shares (100%) of Business Lease s.r.o. ("Business Lease Czech Republic") and Business Lease Slovakia s.r.o. ("Business Lease Slovakia"). The acquisition was closed on 10 February 2026.
- The transaction price was subject to adjustments on completion and finals at 67 million euros.
- KBC has recognized a goodwill for an amount of 12 million euros in 2026. This is justified by the ability of the combined entities to further increase operational efficiency, optimize customer experience and unlock substantial synergy benefits, including cross-selling opportunities.
- With this strategic transaction, KBC Group significantly expands its leasing activities in Central Europe and strengthens its market position in both countries.

The effect of both acquisitions had a combined limited impact of approximately -50 basis points on KBC's unfloored fully loaded CET-1 ratio in 1Q 2026. For more information, please refer to the separate press releases and the General Investor Presentation on www.kbc.com.

Post-balance sheet events (note 6.8 in the annual accounts 2025)

Significant non-adjusting events between the balance sheet date (30 September 2026) and the publication of this report (12 November 2026):

- As of 1 November 2026, 365.bank has been legally merged with ČSOB (see Note 6.6 for more information).

Statutory auditor's report to the board of directors of KBC Group NV on the review of the condensed consolidated interim financial information as at 30 September 2026 and for the nine-month period then ended

Introduction

We have reviewed the accompanying consolidated balance sheet of KBC Group NV as at 30 September 2026, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement for the nine-month period then ended, and notes on the accounting policies, notes on segment reporting and other notes ("the condensed consolidated interim financial information"). The board of directors is responsible for the preparation and presentation of this condensed consolidated interim financial information in accordance with IAS 34 "Interim Financial Reporting" as adopted by the European Union. Our responsibility is to express a conclusion on this condensed consolidated interim financial information based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information as at 30 September 2026 and for the nine-month period then ended is not prepared, in all material respects, in accordance with IAS 34 "Interim Financial Reporting" as adopted by the European Union.

Credit risk

Snapshot of the loan portfolio (banking activities)

The main source of credit risk is the loan portfolio of the bank. It includes all the loans and guarantees that KBC has granted to individuals, companies, governments and banks. Debt securities in the investment portfolio are included if they are issued by companies or banks. Government bonds are not included. The loan portfolio as defined in this section differs from 'Loans and advances to customers' in Note 4.1 of the 'Consolidated financial statements' section of the annual accounts 2025. For more information, please refer to 'Details of ratios and terms on KBC Group level'.

A snapshot of the banking portfolio is shown in the table below. Further on in this chapter, extensive information is provided on the credit portfolio of each business unit.

[1] Outstanding portfolio includes all on-balance sheet commitments and off-balance sheet guarantees but excludes off-balance sheet undrawn commitments: the amounts are measured in Gross Carrying Amounts.
[2] Business Unit Group Centre = part of non-legacy portfolio assigned to BU Group, activities in wind-down (e.g., ex-Antwerp Diamond Bank). The presence of the residual portfolios of the activities in wind-down explains the high share of impaired loans.
[3] Real estate includes income producing real estate to 3rd parties
[4] Oil, gas & other fuels includes the exploration, production, refining and distribution of oil, gas and other fuels, and biofuels
[5] Other includes corporate sectors not exceeding 0.5% concentration and unidentified sectors
[6] Purchased or originated credit impaired assets

Impaired loans are loans for which full (re)payment of the contractual cash flows is deemed unlikely. This coincides with KBC's Probability-of-Default-classes 10, 11 and 12 (see annual accounts FY 2025 - section on credit risk for more information on PD classification). These impaired loans are equal to 'non-performing loans' under the definition used by EBA.

Loan portfolio per Business Unit (banking activities)

Legend:

- **ind. LTV - Indexed Loan To Value:** current outstanding loan / current value of property
- **Impaired loans:** loans for which full (re)payment is deemed unlikely (coincides with KBC's PD-classes 10, 11 or 12)
- **Impaired loans that are more than 90 days past due:** loans that are more than 90 days overdue and/or loans which have been terminated/cancelled or bankrupt obligors (coincides with KBC's PD-classes 11 and 12)
- **Stage 1+2 impairments**: impairments for non-impaired exposure (i.e. exposure with PD < PD 10)
- **Stage 3 impairments**: loan loss impairments for impaired exposure (i.e. exposure with PD 10, 11 or 12)
- **Cover ratio impaired loans:** stage 3 impairments / impaired loans

In 9M 2026, the acquisition of 365.bank had an impact of 3 716 million euros on the total loan portfolio in Slovakia. This consists of 3 313 million euros allocated to retail (of which 2 250 million euros to mortgages and 1 063 million euros to consumer finance), 11 million euros to SME, and 392 million euros to corporate.

Solvency

KBC reports its solvency at group, banking and insurance level, calculating it on the basis of IFRS figures and the relevant guidelines issued by the competent regulator.

Solvency KBC Group

For the KBC group, we calculate our solvency ratios based on CRR/CRD. This regulation entered gradually into force as of 1 January 2014. In addition to the official transitional solvency ratios, KBC also reports 'fully loaded' figures, assuming the full application of all regulatory rules, without any transitional relief. In the figures below, 'fully loaded' is to be understood as 'unfloored fully loaded', which means no transitional relief except for the output floor (expected to become a constraint only as from 2033 onwards)."

Based on CRR/CRD, profit can be included in CET1 capital only after the profit appropriation decision by the final decision body, for KBC Group it is the General Meeting. ECB can allow to include interim or annual profit in CET1 capital before the decision by the General Meeting. In that case, the foreseeable dividend should be deducted from the profit that is included in CET1.

Our Dividend Policy includes a pay-out range of 50%-65% (pay-out ratio, including AT1 coupon), this allows KBC Group to request ECB approval to include the interim or annual profit in transitional CET1 capital before the decision by the General Meeting. The pay-out ratio to be applied in the transitional CET1 capital is the higher of the maximum pay-out ratio in the Dividend Policy (65%), the pay-out ratio (calculated as the dividend in % of net profit under the Danish Compromise) of previous year (62% for 2026 reporting) and the average pay-out ratio of the three previous years (69% for 2026 reporting). The foreseeable dividend that is included in the transitional CET1 capital cannot be lower than the interim dividend in the Dividend Policy (1 euro per share).

The *fully loaded* figures immediately reflect the interim or annual profit, taking into account 50% payout and/or any dividend proposal and/or decision by the Board of Directors.

The general rule under CRR/CRD for insurance participations is that an insurance participation is deducted from common equity at group level, unless the competent authority grants permission to apply a risk weighting instead (Danish compromise). As of the fourth quarter of 2020, the revised CRR/CRD requires the use of the equity method, unless the competent authority allows institutions to apply a different method. KBC Group has received ECB approval to continue to use the historical carrying value for risk weighting (250%), after having deconsolidated KBC Insurance from the group figures.

In addition to the solvency ratios under CRR/CRD, KBC is considered a financial conglomerate since it covers both significant banking and insurance activities. Therefore KBC also has to disclose its solvency position as calculated in accordance with the Financial Conglomerate Directive (FICOD; 2002/87/EC). This implies that available capital is calculated on the basis of the consolidated position of the group and the eligible items recognised as such under the prevailing sectorial rules, which are CRR/CRD for the banking business and Solvency II for the insurance business. The capital requirement for the insurance business based on Solvency II is multiplied by 12.5 to obtain a risk weighted asset equivalent.

The overall capital requirement (CET1) that KBC is to uphold is set at 10.93% (fully loaded, Danish Compromise which includes the CRR/CRD minimum requirement (4.50%), the Pillar 2 Requirement (1.10% P2R, taking into account CRD V Art 104a(4)) and the buffers set by national competent authorities (2.50% Capital Conservation Buffer, 1.50% buffer for other systemically important banks, and 1.33% Countercyclical Buffer). Furthermore ECB has set a Pillar 2 Guidance of 1.0%. In line with CRD V Art. 104a(4), ECB allows banks to satisfy the P2R (1.95%) with additional tier-1 instruments (up to 1.5/8, so up to 0.37%) and tier-2 instruments (up to 2/8, so up to 0.49%) based on the same relative weights as allowed for meeting the 8% Pillar 1 Requirement.

Distributions (being dividend payments, payments related to additional tier 1 instruments or variable remuneration) are limited in case the combined buffer requirements described above are breached. This limitation is also referred to as "Maximum Distributable Amount" or "MDA" thresholds.

The next table provides an overview of the buffers KBC Group has compared to these thresholds, both on an actuals basis (i.e. versus the regulatory targets that apply at the reporting date) and a fully loaded basis (i.e. versus the regulatory targets that will apply going forward).

Buffer vs. Overall Capital Requirement (in millions of EUR) (consolidated, under CRR, Danish compromise method)	30-09-2026		31-12-2025	
	Fully loaded	Actuals	Fully loaded	Actuals
CET1 Pillar 1 minimum	4.50%	4.50%	4.50%	4.50%
Pillar 2 requirement to be satisfied with CET1	1.10%	1.10%	1.10%	0.98%
Capital conservation buffer	2.50%	2.50%	2.50%	2.50%
Buffer for systemically important institutions (O-SII)	1.50%	1.50%	1.50%	1.50%
Systemic Risk Buffer (SRyB)	0.00%	0.00%	0.00%	0.10%
Entity-specific countercyclical buffer	1.33%	1.27%	1.28%	1.15%
Overall Capital Requirement (OCR) - with P2R split, CRD Art. 104a(4)	**10.93%**	**10.86%**	**10.87%**	**10.74%**
CET1 used to satisfy shortfall in AT1 bucket[1]	0.07%	0.05%	-0.07%	-0.13%
CET1 used to satisfy shortfall in T2 bucket	0.00%	0.00%	0.10%	0.02%
CET1 requirement for MDA	**10.99%**	**10.91%**	**10.91%**	**10.74%**
CET1 capital	20 216	19 692	19 228	18 795
CET1 buffer (= buffer compared to MDA)	4 943	4 697	5 100	5 095

[1] The negative figures re. the AT1 bucket in above table refer to a surplus of AT1 instruments: this surplus can be used to offset a shortfall in Tier 2; it cannot bring the MDA threshold below the OCR threshold.

Following table groups the solvency on the level of KBC Group according to different methodologies and calculation methods, including the deduction method.

Overview of KBC Group's capital ratios (in millions of EUR) 30-09-2026		numerator (common equity)	denominator (total weighted risk volume)	ratio (%)
Common Equity ratio				
Danish Compromise	Fully loaded	20 216	138 908	14.55%
Deduction Method	Fully loaded	19 787	137 836	14.36%
Financial Conglomerates Directive	Fully loaded	22 862	162 855	14.04%
Danish Compromise	Transitional	19 692	137 439	14.33%
Deduction Method	Transitional	19 211	136 235	14.10%
Financial Conglomerates Directive	Transitional	22 338	161 386	13.84%

KBC's fully loaded CET1 ratio of 14.55% at the end of September 2026 represents a solid capital buffer of 3.56% compared with the Maximum Distributable Amount (MDA) of 10.99%.

The EBA Monitoring report on AT1, Tier 2 and TLAC / MREL eligible liabilities instruments (27 June 2024) recommends to use the carrying amounts (including accrued interest and hedge adjustments) instead of nominal amounts for own funds calculation. KBC has applied this EBA recommendation as from 30 September 2024. Implementation of this approach increases the volatility in the Tier 2 capital: as at 30 September 2026 it has a -35 million euros negative impact on Tier 2 capital at KBC Group level (compared to 26 million euros on 30 June 2026).

Total capital ratio	18.87%	18.70%	19.17%	19.11%

Note:

- For the composition of the banking RWA, see section 'Solvency banking and insurance activities separately' further in this report.
- As at 30-09-2026, the difference between the fully loaded total own funds (26 218 million euros) and the transitional own funds (25 695 million euros) is mainly explained by the different foreseeable dividend that is deducted: 50% pay-out is applied in the fully loaded figures whereas the deduction in the transitional figures is in line with interim profit recognition rules as described above. Furthermore, there is small difference at the level of the IRB excess/shortfall.
- At year-end 2025, the difference between the fully loaded and the transitional figure is explained by the foreseeable final dividend (1 626 million euros as proposed to the General Meeting of shareholders in fully loaded versus 2 064 million euros based on interim profit recognition rules in the transitional figures) and the impact of the IRB excess/shortfall (-6 million euros higher in the fully loaded figures).
- Under our current policy (applicable as of 3Q 2025), we upstream the insurance dividend to the Group on a quarterly basis with one quarter delay. As such, we upstreamed 208m EUR in 3Q 2026.

Solvency banking and insurance activities separately

As is the case for the KBC group, the solvency of KBC Bank is calculated based on CRR/CRD. The solvency of KBC Insurance is calculated on the basis of Solvency II rules as they became effective on 1 January 2016.

The tables below show the tier-1 and CAD ratios calculated under CRR/CRD for KBC Bank, as well as the solvency ratio of KBC Insurance under Solvency II.

Regulatory capital requirements KBC Bank (consolidated) (in millions of EUR)	30-09-2026 Fully loaded	30-09-2026 Transitional	31-12-2025 Fully loaded	31-12-2025 Transitional

Minimum requirement for own funds and eligible liabilities (MREL)

Besides the ECB and NBB, which supervise KBC on a going concern basis, KBC is also subject to requirements set by the Single Resolution Board (SRB). The SRB is developing resolution plans for the major banks in the euro area. The resolution plan for KBC is based on a Single Point of Entry (SPE) approach at the level of KBC Group with 'bail-in' as the primary resolution tool. MREL measures the amount of own funds and eligible liabilities that can be credibly and feasibly bailed-in.

In April 2026, the SRB formally communicated to KBC binding MREL targets (under BRRD2), expressed as a percentage of Risk Weighted Assets (RWA) and Leverage Ratio Exposure Amount (LRE):

- 27.52% of RWA (including transitional Combined Buffer Requirement(1) of 5.27% in 3Q 2026)
- 7.46% of LRE

Besides a total MREL amount, BRRD2 also requires KBC to maintain a certain part of MREL in subordinated format (i.e. instruments subordinated to liabilities, excluded from bail-in).

The binding subordinated MREL targets are:

- 22.42% of RWA (including the Combined Buffer Requirement(1) of 5.27% in 3Q 2026)
- 7.46% of LRE

At the end of September 2026,

- The MREL ratio in % of RWA decreased to 30.7% (versus 31.1% at the end of 2Q 2026), driven by lower available MREL (chiefly due to the call of the 400 million GBP HoldCo Senior instrument, partly offset by higher CET1 capital) and higher RWA.
- The MREL ratio in % of LRE decreased to 10.5% (versus 10.6% at the end of 2Q 2026) driven by lower available MREL.

(1) Combined Buffer Requirement (transitional) = Conservation Buffer (2.50%) + O-SII Buffer (1.50%) + Countercyclical Buffer (1.27%) comes on top of the MREL target as a percentage of RWA.

Details of ratios and terms on KBC Group level

Basic and diluted earnings per share

Gives an idea of the amount of profit over a certain period that is attributable to one share (and, where applicable, including dilutive instruments).

Calculation (in millions of EUR)	Reference	9M 2026	2025	9M 2025
Result after tax, attributable to equity holders of the parent (A)	'Consolidated income statement'	2 851	3 568	2 566
+				
Pro rata coupon on the additional tier-1 instruments included in equity, after tax (B)	'Consolidated statement of changes in equity'	- 94	- 117	- 83
/				
Average number of ordinary shares less treasury shares (in millions) in the period (C)	Note 5.10	397	397	397
or				
Average number of ordinary shares plus dilutive options less treasury shares in the period (D)		397	397	397
Basic = (A+B) / (C) (in EUR)		6.95	8.70	6.26
Diluted = (A+B) / (D) (in EUR)		6.95	8.70	6.26

Combined ratio (non-life insurance – including reinsurance)

Gives insight into the technical profitability of the short-term non-life insurance business, more particularly the extent to which insurance premiums adequately cover claim payments and expenses. The combined ratio is defined net of reinsurance.

Calculation (in millions of EUR or %)	Reference Note 3.6.1	9M 2026	2025	9M 2025
Non-life PAA - Claims and claim related costs net of reinsurance (A)		1 168	1 421	1 058
	Part of 'Insurance Service Expenses'	1 221	1 446	1 084
	Part of 'Operating expenses (incl. banking and insurance tax)'	2	2	1
	Amounts recoverable from reinsurer	- 55	- 28	- 27
+				
Non-life PAA - Costs other than claims and commissions (B)		642	804	588
	Part of 'Insurance Service Expenses'	609	760	557
	Part of 'Operating expenses (incl. banking and insurance tax)'	41	53	38
	Commissions received	- 8	- 9	- 7
/				
Non-life PAA - Net earned expected premiums received (C)		2 075	2 565	1 898
	Part of 'Insurance revenues before reinsurance'	2 157	2 672	1 978
	Premiums paid to reinsurer	- 82	- 107	- 80
= (A+B) / (C)		87%	87%	87%

Common equity ratio

A risk-weighted measure of the group's solvency based on common equity tier-1 capital (the ratios given here are based on the Danish compromise). Changes to the capital rules are gradually being implemented to allow banks to build up the necessary capital buffers. The capital position of a bank, when account is taken of the transition period, is referred to as the 'transitional' view. The capital position based on full application of all the rules – as would be the case after this transition period – is referred to as 'fully loaded'.

A detailed calculation can be found under 'Solvency KBC Group' section.

Cost/income ratio without bank and insurance tax (group)

Gives an impression of the relative cost efficiency (costs relative to income without bank and insurance tax, but including insurance commissions paid) of the group.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Cost/income ratio				
Total Opex without bank and insurance tax (A)	Consolidated income statement	3 670	4 599	3 375
+				
Insurance commissions paid (B)	Consolidated income statement	345	429	315
/				
Total income (C)	Consolidated income statement	10 123	12 200	8 997
=(A+B) / (C)		40%	41%	41%

Where relevant, we also exclude the exceptional and/or non-operating items when calculating the cost/income ratio. This calculation aims to give a better idea of the relative cost efficiency of the pure business activities. The adjustments include: MTM ALM derivatives (fully excluded), bank and insurance taxes (including contributions to European Single Resolution Fund) are included pro rata and hence spread over all quarters of the year instead of being recognised for the most part upfront (as required by IFRIC 21) and one-off items. The Cost/Income ratio adjusted for specific items is 43% in 9M 2026 (versus 46% in 2025).

Cover ratio

Indicates the proportion of impaired loans (see 'Impaired loans ratio' for definition) that are covered by impairment charges. The numerator and denominator in the formula relate to all impaired loans, but may be limited to impaired loans that are more than 90 days past due (the figures for that particular calculation are given in the 'Credit risk' section.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Stage 3 impairment on loans (A)	'Credit risk: loan portfolio overview' table in the 'Credit risk' section	2 089	2 002	2 013
/				
Outstanding impaired loans (B)	'Credit risk: loan portfolio overview' table in the 'Credit risk' section	4 457	4 097	3 997
= (A) / (B)		46.9%	48.9%	50.4%

Credit cost ratio

Gives an idea of loan impairment charges recognised in the income statement for a specific period, relative to the total loan portfolio (see 'Loan portfolio' for definition). In the longer term, this ratio can provide an indication of the credit quality of the portfolio.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Net changes in impairment for credit risks (A)	'Consolidated income statement': component of 'Impairment'	352	277	204
/				
Average outstanding loan portfolio (B)	'Credit risk: loan portfolio overview' table in the 'Credit risk' section	240 756	219 422	217 727
= (A) (annualised) / (B)		0.18%	0.13%	0.12%

In 1Q 2026, the increase in the ECL and management overlay for geopolitical and macroeconomic uncertainties is not annualized.

In 9M 2026, the credit cost ratio without ECL and management overlay for geopolitical and macroeconomic uncertainties and without the recent acquisitions, amounts to 0.12% (versus 0.13% in 2025).

Impaired loans ratio

Indicates the proportion of impaired loans in the loan portfolio (see 'Loan portfolio' for definition) and, therefore, gives an idea of the creditworthiness of the portfolio. Impaired loans are loans where it is unlikely that the full contractual principal and interest will be repaid/paid. These loans have a KBC default status of PD 10, PD 11 or PD 12. Where appropriate, the numerator in the formula may be limited to impaired loans that are more than 90 days past due (PD 11 + PD 12). Relevant figures for that calculation are given in the 'Credit Risk' section.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Amount outstanding of impaired loans (A)	'Credit risk: loan portfolio overview' table in the 'Credit risk' section	4 457	4 097	3 997
/				
Total outstanding loan portfolio (B)	'Credit risk: loan portfolio overview in the 'Credit risk' section	250 075	227 942	224 550
= (A) / (B)		1.8%	1.8%	1.8%

Leverage ratio

Gives an idea of the group's solvency, based on a simple non-risk-weighted ratio.

A detailed calculation can be found under 'Solvency KBC Group' section.

Liquidity coverage ratio (LCR)

Gives an idea of the bank's liquidity position in the short term, more specifically the extent to which the group is able to overcome liquidity difficulties over a one-month period. It is the average of 12 end-of-month LCR figures.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Stock of high-quality liquid assets (A)	Based on the European Commission's Delegated Act on LCR and the European Banking Authority's guidelines for LCR disclosure	101 244	101 296	100 837
/				
Total net cash outflows over the next 30 calendar days (B)		64 694	63 637	64 036
= (A) / (B)		157%	159%	158%

KBCs large stock of high-quality liquid assets (approximately 101 billion euros in 3Q 2026), which consist of cash and bonds which can be repoed in the private market and at the central banks. Note that the 101 billion euros consist of:

- 21 billion euros (or 21%) 'Cash & Central Bank receivables' (= liquidity that could at all times be used instantaneously to cover outflows)
- 80 billion euros (or 79%) 'LCR eligible bonds' which are reported at fair value at all times, independent of IFRS classification

Loan Portfolio

Gives an idea of the magnitude of (what are mainly traditional) lending activities.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Loans and advances to customers (A)	Note 4.1, component of 'Loans and advances to customers'	225 003	208 612	206 113
+				
Reverse repos (not with Central Banks) (B)	Note 4.1, component of 'Reverse repos with credit institutions'	7 735	1 997	1 458
+				
Debt instruments issued by corporates and by credit institutions (not with Central Banks) (banking) (C)	Note 4.1, component of 'Debt instruments issued by corporates and by credit institutions'	4 137	5 007	5 193
+				
Other exposures to credit institutions (D)		3 639	3 656	3 238
+				
Financial guarantees granted to clients and other commitments (E)	Note 6.1, component of 'Financial guarantees given'	11 128	11 415	11 672
+				
Impairment on loans (F)	Note 4.2, component of 'Impairment'	2 739	2 501	2 521
+				
Insurance entities (G)	Note 4.1, component of 'Loans and advances to customers'	- 1 417	- 1 730	- 1 765
+				
Non-loan-related receivables (H)		- 1 176	- 402	- 553
+				
Other (I)	Component of Note 4.1	- 1 712	- 3 115	- 3 327
Gross Carrying amount = (A)+(B)+(C)+(D)+(E)+(F)+(G)+(H)+(I)		250 075	227 942	224 550

Net interest margin

Gives an idea of the net interest income of the banking activities (one of the most important sources of revenue for the group) relative to the average total interest-bearing assets of the banking activities.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Net interest income of the banking activities (A)	'Consolidated income statement': component of 'Net interest income'	4 690	5 479	4 033
/				
Average interest-bearing assets of the banking activities (B)	'Consolidated balance sheet': component of 'Total assets'	282 325	260 754	258 438
= (A) (annualised x360/number of calendar days) / (B)		2.19%	2.07%	2.06%

The net interest margin is the net interest income of the banking activities, excluding dealing rooms and the net interest impact of ALM FX swaps and repos.

Net stable funding ratio (NSFR)

Gives an idea of the bank's structural liquidity position in the long term, more specifically the extent to which the group is able to overcome liquidity difficulties over a one-year period.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Available amount of stable funding (A)	Regulation (EU) 2019/876 dd. 20-05-2019	242 282	234 686	226 932
/				
Required amount of stable funding (B)		185 386	170 629	168 934
= (A) / (B)		131%	138%	134%

Parent shareholders' equity per share

Gives the carrying value of a KBC share, i.e. the value in euros represented by each share in the parent shareholders' equity of KBC.

Calculation (in millions of EUR or number)	Reference	9M 2026	2025	9M 2025
Parent shareholders' equity (A)	'Consolidated balance sheet'	26 239	25 404	24 093
/				
Number of ordinary shares less treasury shares (at period-end) (B)	Note 5.10	397	397	397
= (A) / (B) (in EUR)		66.15	64.04	60.76

Return on allocated capital (ROAC) for a particular business unit

Gives an idea of the relative profitability of a business unit, more specifically the ratio of the net result to the capital allocated to the business unit.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
BELGIUM BUSINESS UNIT				
Result after tax (including minority interests) of the business unit (A)	Note 2.2: Results by segment	1 778	2 151	1 477
/				
The average amount of capital allocated to the business unit is based on the risk-weighted assets for the banking activities (CRR/CRD) and risk-weighted asset equivalents for the insurance activities (under Solvency II) (B)		10 324	9 662	9 637
= (A) annualised / (B)		23.0%	22.3%	20.4%
CZECH REPUBLIC BUSINESS UNIT				
Result after tax (including minority interests) of the business unit (A)	Note 2.2: Results by segment	746	922	691
/				
The average amount of capital allocated to the business unit is based on the risk-weighted assets for the banking activities (CRR/CRD) and risk-weighted asset equivalents for the insurance activities (under Solvency II) (B)		2 825	2 499	2 450
= (A) annualised / (B)		35.1%	36.9%	37.7%
INTERNATIONAL MARKETS BUSINESS UNIT				
Result after tax (including minority interests) of the business unit (A)	Note 2.2: Results by segment	619	814	609
/				
The average amount of capital allocated to the business unit is based on the risk-weighted assets for the banking activities (CRR/CRD) and risk-weighted asset equivalents for the insurance activities (under Solvency II) (B)		3 367	2 875	2 826
= (A) annualised / (B)		24.5%	28.3%	28.7%

Return on equity

Gives an idea of the relative profitability of the group, more specifically the ratio of the net result to equity.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Result after tax, attributable to equity holders of the parent (A)	'Consolidated income statement'	2 851	3 568	2 566
-				
Coupon on the additional tier-1 instruments included in equity (B)	'Consolidated statement of changes in equity'	- 94	- 117	- 83
/				
Average parent shareholders' equity (C)	'Consolidated statement of changes in equity'	25 821	23 925	23 270
= (A+B) (annualised) / (C)		14.2%	14.4%	14.2%

When bank and insurance taxes are evenly spread throughout the year and excluding one-offs, the return on equity in 9M 2026 amounted to 16%. Similarly, the return on tangible equity in 9M 2026 amounted to 18%.

Sales Life (insurance)

Total sales of life insurance compromise new business of guaranteed interest contracts, unit-linked investment contracts and hybrid contracts.

Calculation (in millions of EUR or %)	Reference	9M 2026	2025	9M 2025
Guaranteed Interest products		1 056	1 501	994
+				
Unit-Linked products		1 543	1 801	1 320
+				
Hybrid products		175	274	197
Total sales Life (A)+ (B) + (C)		2 775	3 576	2 511

Solvency ratio (insurance)

Measures the solvency of the insurance business, as calculated under Solvency II.

A detailed calculation can be found under 'Solvency banking and insurance activities separately' section.

Total assets under management

Total assets under management (AuM) consist of direct client money (Assets under Distribution towards retail, private banking and institutional clients), KBC Group assets (incl. pension fund), fund-of-funds assets and investment advice. Total AuM comprise assets managed by the group's various asset management companies (KBC Asset Management, ČSOB Asset Management, etc.), as well as assets under advisory management at KBC Bank. The size and development of total AuM are major factors behind net fee and commission income (generating entry and management fees) and hence determine a large part of any change in this income line.
