Financial Review

“We’re pleased to report solid financial results for the first nine months of the year with a profit before tax of DKK 271m, up from DKK 136m in the year-earlier period.

The favourable performance was mainly driven by an increase in central bank and market rates, increases in both deposits and lending, the return on the investment portfolio and a good performance by the insurance business during the quarter. Furthermore, the customer portfolio maintained its sound credit quality despite a generally volatile economic environment of rising interest rates and high inflation.

Prospects are generally good for the rest of the year, and as reported in a previous announcement, we have raised our net profit guidance from DKK 235-265m to the DKK 260-290m range,” said BankNordik CEO Turið F. Arge.

Guidance for 2023

On 19 September 2023, the Bank raised its financial guidance for the third time since the initial guidance for the year provided February. The original guidance was for net profit of DKK 190-220m. This was raised to DKK 210-240m on 18 April and to DKK 235-265m on 16 June 2023. The current guidance is for net profit for 2023 in the DKK 260-290m range. The drivers of the increase in expected net profit remain rising policy and market rates and the fact that the Bank's customer remain resilient in the face of inflationary pressures, keeping impairments low. In addition, the Bank's return on its investment portfolio continues to exceed expectations.

The guidance is subject to uncertainty, including impairments on loans and advances, market value adjustments, and macroeconomic developments in the markets in which the Group operates.

Profit before tax for the first nine months of 2023 totalled DKK 112m. This was significantly higher than the DKK 21m posted for the same period of 2022. The drivers behind the difference were net interest income and investment portfolio earnings.

Although the trend in recent years has been for Faroese households to increasingly embrace the traditional Danish financing model of 80% LTV mortgage funding with the residual in 2nd lien bank lending, interest rate conditions of the past year or so have affected the type of loans preferred by customers. The Bank expects this trend to reverse in the longer term. Deposits held by personal customers rose by DKK 94m in Q3 2023 to DKK 5,678m at 30 September.

Insurance: Trygd

Trygd reported premium income of DKK 37m in Q3 2023, DKK 1m higher than in Q3 2022. In Q3 2023 claims were DKK 17m, DKK 8m lower than in Q3 2022. Net income from investment activities amounted to DKK 2m in Q3 2023 compared to a loss of DKK 3m in Q3 2022. As a result, operating income was DKK 22m in Q3 2023, DKK 14m higher than in Q3 2022.

Operating costs were DKK 7m in Q3 2023, DKK 1m higher than in the third quarter of 2022. As a result, Trygd reported a profit before tax for the quarter of DKK 14m, compared to a profit before tax of DKK 1m in Q3 2022.

Profit before tax for the first nine months of 2023 totalled DKK 20m, significantly higher than the DKK 5m seen in the same period of 2022.

Trygd continues to consolidate its market position as a provider of non-life insurance in the Faroe Islands. An increase in market share, optimisation of Trygd's pricing structure as well as general market growth related to developments in the Faroese economy have driven an increase in premiums. As operating costs remain low, these developments contribute to margin improvements.

Trygd's claims vary significantly from one period to the next due to the limited size of the Faroese insurance market as well the timing and severity of weather events, which adds volatility to the financial results.

The BankNordik Group holds a license to operate as a bank and is therefore subject to a capital requirement under the Faroese Financial Business Act and to CRR. The Faroese provisions on capital requirements apply to both the Parent Company and the Group. The capital requirement provisions stipulate a minimum capital of 8% of the identified risks. A detailed body of rules determines the calculation of capital as well as risks (risk-weighted items). The capital comprises CET 1 capital, hybrid core capital and subordinated loan capital. The CET 1 capital corresponds to the carrying amount of equity, after deductions of holdings of own shares, tax assets and other minor deductions.

Notes to the financial statements

Note 1 Significant accounting policies

The consolidated financial statements for the first nine months of 2023 have been prepared in accordance with IAS 34 "Interim Financial Reporting" supplemented by additional Faroese disclosure requirements for quarterly reports of listed financial companies and in accordance with the financial reporting requirements of the Nasdaq exchange in Copenhagen. The financial statements of the Parent Company, P/F BankNordik, have been prepared in accordance with the Faroese Financial Business Act and with the executive order on financial reports of credit institutions etc. of the Danish FSA as applied in the Faroe Islands.

The application of IAS 34 means that the disclosure of figures is less detailed than the disclosure in a full annual report and that the valuation principles laid down by the international financial reporting standards (IFRS) are applied.

The Group's significant accounting policies are consistent with those applied in the Annual Report 2022. The Annual Report 2022 provides a full description of the Group's significant accounting policies. Regarding the implementation of IFRS 17 'Insurance contracts' as of 1. January 2023 there has not been any significant impact on the income statement, assets, liabilities, and equity in prior periods or in 2023.

Future financial reporting standards and interpretations

The International Accounting Standards Board (IASB) has issued a number of new accounting standards (IAS and IFRS) and interpretations (IFRIC) that have not yet entered into force. Please refer to the Annual Report 2022 for further information.

Accounting estimates

The measurement of certain assets and liabilities requires management to estimate how future events will impact on the value of such assets and liabilities. Estimates of significance to the financial reporting are made in connection with determining the impairment of loans and advances, the fair value of unlisted financial instruments, provisions, business acquisitions etc. Estimates are based on assumptions that management considers appropriate, but which are inherently uncertain.

The most significant estimates that management makes in applying the Group's accounting policies and the most important uncertainty affecting estimates made when preparing the condensed interim report are unchanged from the estimates made in connection with the preparation of the Annual Report 2022 and the uncertainties prevailing at that time.

Determination of fair value

The fair value of financial assets is measured on the basis of quoted market prices of financial instruments traded in active markets. If an active market exists, fair value is based on the most recently observed market price at the balance sheet date.

If a financial instrument is quoted in a market that is not active, the Group bases its measurement on the most recent transaction price. Adjustment is made for subsequent changes in market conditions, for instance by including transactions in similar financial instruments that are assumed to be motivated by normal business considerations.

If no active market for standard and simple financial instruments, such as interest rate and currency swaps and unlisted bonds, exists, generally accepted valuation techniques rely on market-based parameters for measuring fair value. The results of calculations made on the basis of valuation techniques are often estimates because exact values cannot be determined from market observations. Consequently, additional parameters, such as liquidity risk and counterparty risk, are sometimes used for measuring fair value.
