

## COMPANY ANNOUNCEMENT

10 February 2022

No. 02-2022 – inside information

### **ViroGates announces a new routine customer in Finland using suPARnostic® TurbiLatex for Emergency Department triage**

**BIRKERØD, DENMARK** – ViroGates A/S, a medical technology company developing blood tests for better triaging in hospitals to improve patient care and reduce healthcare costs, today announces that a large hospital in Finland has started using suPARnostic® TurbiLatex in clinical routine to help triage patients in the Emergency Department of the hospital. As part of the project, the hospital has conducted an in-house validation and actively followed and conducted suPAR research. The hospital has decided to implement suPARnostic® TurbiLatex primarily to help discharge patients for more efficient patient triage.

**Jakob Knudsen, CEO of ViroGates, says:** *"We are delighted to work with this new hospital customer, and we remain optimistic about the Finnish market. Our distribution partner has excellent contacts, and the use of suPARnostic® TurbiLatex for use in emergency department triage is generally seen as a valuable tool to save costs and improve patient outcomes. We hope to expand further in this market within the foreseeable future".*

#### **About ViroGates**

ViroGates A/S is an international medical technology company developing and marketing blood test products under the suPARnostic® brand for better triaging in hospitals to improve patient care, reduce healthcare costs and empower clinical staff.

The company was founded in 2000. Headquartered in Denmark, ViroGates' sales force covers the Nordics, Spain, France and Benelux, while distributors serve other markets.

ViroGates' shares (VIRO) are listed on Nasdaq First North Growth Market Denmark. For more information, visit [www.virogates.com](http://www.virogates.com).

**About suPAR and suPARnostic®**

suPAR is a biomarker detected by ViroGates' suPARnostic® products. It is a protein found in the plasma. suPAR is considered a general risk status biomarker indicating inflammation and can indicate disease presence, severity, and progression across disease areas such as cardiovascular diseases, kidney diseases, type 2 diabetes, cancer, etc. Strong scientific evidence from more than 800 clinical trials and studies shows that the higher the level of suPAR, the worse the prognosis for the patient.

The suPARnostic® products can be used to support healthcare professionals in making clinical decisions on hospitalisation or discharge of acute care patients. The increasing global demands on health systems and tightening healthcare budgets necessitate efficiency improvements and innovative hospital solutions. The use of suPAR in clinical routine in emergency departments can improve patient care and reduce healthcare costs by increasing the number of discharges by up to 34% and reducing the average hospital length of stay by up to 6% without affecting mortality. suPARnostic® TurbiLatex is currently available on Roche Diagnostics' cobas® instruments, Siemens Healthineers ADVIA® XPT and Atellica® instruments and the Abbott Labs Architect™ and Alinity™ instruments. ViroGates works with partners to develop solutions for other platforms.
