Aarsleff enters into a contract for the next phase of data centre in Odense

Aarsleff has entered into a contract with a large multinational company for the Civil Works Package in connection with the extension of a data centre in Odense.

Aarsleff is to carry out all earthwork and concrete work on the project, comprising soil management of significant amounts of soil, sand and gravel as well as construction of several kilometres of cable trenches with installation of cables and pipes. In addition, Aarsleff is to design, produce and install 3,000 prefabricated concrete structures such as chambers, foundations and beams and cast thousands of cubic metres of in situ concrete.

The contract has a total value of approx. DKK 2.4 billion. The work begins now and is expected to be completed in August 2025.

The contract does not affect Aarsleff's earnings expectations for the financial year 2021/22.
