

FOM Technologies selected as a finalist for the American Cleantech Alliance Award 2025.

13.11.2025 06:30:00 CET | FOM Technologies | Investor News

Investor news no. 60 – 2025 | Copenhagen, the 13th of November 2025

FOM Technologies was selected as one of four finalists for the 2025 Cleantech Alliance Awards in the Emerging Company category. The awards ceremony took place at the Cleantech Innovation Showcase on November 5, 2025, in Seattle, Washington. The recognition highlights FOM's growing role as a trusted technology partner in the US cleantech community.

The Cleantech Alliance is one of North America's most influential industry networks, representing over 1,200 member organizations working across renewable energy, environmental innovation, and sustainable manufacturing. Its annual awards celebrate companies that are driving tangible progress toward a cleaner, and more resilient future.

This year's award finalists were selected in recognition of their contributions to innovation and advancement in the cleantech sector. FOM Technologies participated as finalist in the award ceremony with 3 other companies: Mast Reforestation, Salish Elements and Res-Intel, each offering unique solutions for a more sustainable world, with Res-Intel being selected as the winner.

Group CEO, Michael Stadi, states:

"That we, as a smaller Danish company, are named a finalist in a major American cleantech Award strengthens our daily work and the belief that we develop innovative solutions and products within materials research that advance the cleantech sector. Our machinery plays a key role in enabling faster and more scalable breakthroughs, and the nomination reflects the deep expertise our scientists bring to the customers we support every day."

With operations in Europe, Asia and North America, FOM Technologies continues its mission to support researchers, engineers, and industry leaders with precision-engineered slot-die technologies and expert-led support, helping accelerate innovation across clean and emerging technologies.

This investor news will not change the 2025 financial guidance.
