

FOM Technologies publish H1 2026 Report.

12.8.2026 17:23:01 CEST | FOM Technologies | Half year financial report

Company announcement no. 104 – 2026 | Copenhagen, the 12th of August 2026

FOM Technologies today published the company's H1 2026 report. The period has continued to be challenging for the company, but there are signs that commercial activity is gradually returning.

Following a challenging 2025 and a difficult start to 2026, the company is now seeing signs that commercial activity is gradually returning.

Throughout H1 2026, the company maintained its focus on disciplined cost management and adapting its cost structure to realized earnings, thereby continuing to lower the break-even point. With the current cost structure, the company is well-positioned to scale efficiently as market conditions evolve.

During the same period, the company continued its focus on innovation and, by the end of H1 2026, possessed its largest and most comprehensive product portfolio to date.

FINANCIAL REPORT H1 2026 (1 January – 30 June 2026) ATTACHED.

The report has not been audited.

HIGHLIGHTS

- Total income for H1 2026 at tDKK 18.738 (+ 14,01 % from tDKK 16.435 in H1 2025).
