

# Seluxit has entered into a partnership with Logarex on Smart Energy solutions

16.2.2021 17:22:58 CET | Seluxit | Company Announcement

Company Announcement nr. 31 | Aalborg 16th of February 2021

Seluxit has entered into a partnership with Logarex to deliver Smart Energy solutions. It consists of the Logarex Smart Meters and the Seluxit Dashboard and wireless communication technology.

The purpose of Smart Meters is to reduce electricity consumption, reduce costs and manage the increased share of renewable energy.

- Smart Meters form the backbone that enables a solid data foundation, which is needed for the stability of our future smart grid.
- The Dashboard gives the overview needed, to make smart decisions.
- End User can save energy when they know their consumption patterns.
- Utility Companies need accurate meter data to manage the fluctuating energy production and consumption.

Our Partner, The Logarex Smart Metering s.r.o. is a Czech firm established in 2011 and is part of the Sunrise Technology Co. Ltd. Group. As a development, production and supplying firm, it specializes in meeting the demands of the energy branch focusing on the measurement, processing and transfer of data.

Seluxit and Logarex expect that their common Smart Energy solution will be on the market beginning of Q3, 2021. Partnerships are a part of Seluxit's strategy and do not change the previously announced guidance.

## About Seluxit

Seluxit connects things to the internet to optimize systems, save resources and save money.

That makes sense for the economy, for the environment and for society.

Seluxit's unique standards-based approach to IoT reduces development time and development costs, and thereby minimizes risks. That gives our customers a fast path to both saving and earning money, because their solution enters the market quickly.

Our end-to-end IoT solutions create value in many ways including optimizing energy usage, improving service efficiency, and allowing for more effective training.
