

## 47 municipalities have bought Dataprocés' KØS platform

19.6.2024 15:01:41 CEST | Dataprocés Group A/S | Investor News

Investor news no. 32/2024: Dataprocés has on June 19th entered into an agreement on our SaaS solution KØS

The contract for KØS has been entered into with a municipality in Jutland and is now the 47th municipality using our solution to assist with overall financial management.

KØS is a platform that helps municipalities with overall financial management. The platform contains three modules, including: KØS: Udvikling i finansieringsgrundlaget (Development in the funding base), KØS: Statsgaranti eller selvbudgettering? (State guarantee or self-budgeting?) and KØS: BefolkningsBlik (PopulationView). By using one or more modules on the KØS platform, the country's municipalities gain in-depth insight into the development of their own revenues and expenses, thereby increasing insight into their own economy.

### General information about agreement announcements as investor news:

All announced agreements are in accordance with Dataprocés' strategic focus and do not change the announced guidance.

As the SaaS platforms MARS, MARC, REVIEW and KØS are central to the guided company strategy, each time a agreement is entered into with a new municipality, it is announced - as well as in the case of an agreement to extend delivery within one of the areas to an already existing customer, if the annual turnover from it is expected to exceed DKK 100,000.

Furthermore, it is announced when an agreement is entered into for the delivery of a DataAnalysis task where the expected fee is greater than DKK 250,000. Similarly, if agreements are entered into for delivery to a new customer in a new customer group, where the expected fee is greater than DKK 250,000.

Dataprocés distinguishes in the announcements between 3 municipality size categories; the 50 smallest municipalities are called municipalities, the 38 middle ones are called larger municipalities and the 10 largest are called top-10 municipalities.
