

Municipality buys in on expansion of Dataprocés' KØS platform

3.6.2025 14:01:51 CEST | Dataprocés Group A/S | Investor News

Investor news no. 18/2025: Dataprocés has of June 3th entered into an agreement with a municipality on Funen on expansion on our SaaS solution KØS.

The agreement has been signed with a municipality on Funen regarding expansion on our KØS solution.

KØS is a platform that helps municipalities with overall financial management. The platform contains three modules, including: KØS: Udvikling i finansieringsgrundlaget (Development in the funding base), KØS: Statsgaranti eller selvbudgettering? (State guarantee or self-budgeting?) and KØS: BefolkningsBlik (PopulationView). By using one or more modules on the KØS platform, the country's municipalities gain in-depth insight into the development of their own revenues and expenses, thereby increasing insight into their own economy.

General information about agreement announcements as investor news:

All announced agreements are in accordance with Dataprocés' strategic focus and do not change the announced guidance.

As the SaaS platforms MARS, MARC and KØS are central to the guided company strategy, each time an agreement is entered into, it is announced - as well as in the case of an agreement to extend delivery within one of the areas to an already existing customer, if the annual turnover from it is expected to exceed DKK 100,000.

Furthermore, it is announced when an agreement is entered into for the delivery of a DataAnalysis task where the expected fee is greater than DKK 250,000. Similarly, if agreements are entered into for delivery to a new customer in a new customer group, where the expected fee is greater than DKK 250,000.

Dataprocés distinguishes in the announcement of SaaS agreements between 3 municipality size categories; the 50 smallest municipalities are called municipalities, the 38 middle ones are called larger municipalities and the 10 largest are called top-10 municipalities.
