

Larger municipality on Funen expands with MARC Helbredstillæg

3.10.2025 10:20:57 CEST | Dataprocés Group A/S | Investor News

Investor news no. 43/2025: Dataprocés has on October 3th entered into an agreement on our SaaS solution MARC Helbredstillæg

The agreement on MARC Helbredstillæg has been entered into with a larger municipality on Funen. The municipality was already a customer of our MARC platform, but is now expanding the collaboration with Dataprocés.

MARC Helbredstillæg automates and supports the work involved in processing the health allowance. The solution automates the majority of invoice processing for both electronic and physical invoices, benefiting citizens, employees, and the municipality as a whole.

General information about agreement announcements as investor news:

All announced contracts are in accordance with Dataprocés' strategic focus and do not change the announced guidance. As the SaaS platforms MARS, MARC, KØS and KommuneProfil are central to the guided business strategy, each time a contract is entered into with a new municipality - as well as an agreement on the expansion of delivery within one of the areas to an already existing customer, if the annual turnover from there is expected to exceed DKK 100,000. Furthermore, an agreement is entered into on the delivery of a Data Analysis assignment where the expected fee is greater than DKK 250,000. Similarly, if agreements are entered into for delivery to a new customer in a new customer group, where the expected fee is greater than DKK 250,000.

In announcements, Dataprocés distinguishes between three categories of municipality size; The 50 smallest municipalities are referred to as municipalities, the 38 middle municipalities are referred to as larger municipalities and the 10 largest are referred to as top-10 municipalities.
