Investor news no. 67/2025: Larger municipality on Zealand has bought Dataproces' MARC platform

Dataproces has entered a contract with a larger municipality on Zealand for the use of our SaaS solution MARC Afstemning. MARC Afstemning is a scalable SaaS solution that automates complex reconciliation and control tasks in the public sector. The solution uses the MARC software robot to perform repetitive, manual processes 2–10 times faster than traditional case handling. MARC Afstemning collects, consolidates, and validates data across systems—regardless of source, volume, or format—and automatically identifies deviations and inconsistencies. The result is significant time savings, higher data quality, and audit-ready processes that free up customer resources and support efficient, digital operations.

General information about contract announcements as investor news (Updated policy 2025):

All publicly announced contracts are within Dataproces' strategic focus areas and are not considered to change the announced financial guidance. Changes in guidance are only made in the event of total and significant changes in the underlying business.

As MARS, MARC, KØS and KommuneProfil are central to Dataproces' SaaS strategy, all sales of software solutions are announced – both to new municipalities and by expansion to existing customers.

In addition, the following are announced:

· Data analysis tasks with an expected fee of more than DKK 250,000.

· All international sales, regardless of contract value

In investor announcements, municipalities are named according to size to ensure uniform communication:

· The 50 smallest municipalities → municipalities

· The 38 middle → larger municipalities

· The 10 largest → top-10 municipalities
