Investor News No. 16/2026: Municipality in Jutland has bought Dataprocés' KØS platform

Dataprocés has entered a contract with a municipality in Jutland for the use of our SaaS solution KØS: Udvikling i finansieringsgrundlaget (Development in the funding base) og KØS: Selvbudgettering (Self-budgeting).

KØS is a platform that supports municipalities with forecasting in the areas of finance, capacity, and planning. The platform consists of four modules, including: KØS: BudgetPlanlægning (Budget Planning), KØS: Udvikling i finansieringsgrundlaget (Development in the funding base), KØS: Selvbudgettering (Self-budgeting) and KØS: BefolkningsBlik (PopulationView). By using one or more modules within the KØS platform, municipalities across the country gain a solution that provides confidence in their work with finance, capacity, and planning, while strengthening the municipality's long-term governance and strategic management.

General information about contract announcements as investor news (Updated policy 2025):

All publicly announced contracts are within Dataprocés' strategic focus areas and are not considered to change the announced financial guidance. Changes in guidance are only made in the event of total and significant changes in the underlying business.

As MARS, MARC, KØS and KommuneProfil are central to Dataprocés' SaaS strategy, all sales of software solutions are announced – both to new municipalities and by expansion to existing customers.

In addition, the following are announced:

- Data analysis tasks with an expected fee of more than DKK 250,000.
- All international sales, regardless of contract value

In investor announcements, municipalities are named according to size to ensure uniform communication:

- The 50 smallest municipalities → municipalities
- The 38 middle → larger municipalities
- The 10 largest → top-10 municipalities
