Investor News No. 20/2026: Municipality on Zealand has expanded the use of Dataprocés' KØS platform

Dataprocés has entered into a contract with a municipality on Zealand for the expansion of our SaaS solution KØS SkoleBlik and KØS DagsningsBlik, both of which are two areas under KØS BefolkningsBlik.

KØS is a platform that helps municipalities with forecasts within finances, capacity and planning. The platform contains four modules, including: KØS: BudgetPlanning, KØS: Development in the Financing Basis, KØS: Self-Budgeting and KØS: Population Gaze. By using one or more modules on the KØS platform, the country's municipalities get a solution that creates security in the work with finances, capacity and planning and improves the municipality's long-term management.

### **General information about contract announcements as investor news (Updated policy 2025):**

All publicly announced contracts are within Dataprocés' strategic focus areas and are not considered to change the announced financial guidance. Changes in guidance are only made in the event of total and significant changes in the underlying business.

As MARS, MARC, KØS and KommuneProfil are central to Dataprocés' SaaS strategy, all sales of software solutions are announced – both to new municipalities and by expansion to existing customers.

In addition, the following is announced:

- Data analysis tasks with an expected fee of more than DKK 250,000.
- All international sales, regardless of contract value

In investor announcements, municipalities are named according to size to ensure uniform communication:

- The 50 smallest municipalities → municipalities
- The 38 middle → larger municipalities
- The 10 largest → top-10 municipalities
