

Municipality in Jutland Purchases Expansion of Dataprocés' MARS Platform

28.5.2026 06:27:45 CEST | Dataprocés Group A/S | Investor News

Investor news no. 34/2026: Municipality in Jutland has purchased an expansion of Dataprocés' MARS Platform

Dataprocés has entered into a contract with a municipality in Jutland for an expansion of its SaaS solution, MARS Mellemkommunal.

MARS is Dataprocés' SaaS platform that provides digital support for, among other things, municipalities' administration of inter-municipal payments and reimbursements. The solution consolidates data from various municipal professional systems into a single, unified platform and creates a comprehensive overview of who must pay what—and when.

The platform automates large parts of the manual workflows traditionally associated with inter-municipal settlements. As a result, employees no longer need to handle complex spreadsheets, follow-ups, and data checks manually. Instead, MARS employs data-driven validation, quality assurance, and automated workflows.

General information about contract announcements as investor news (Updated policy 2025):

All publicly announced contracts are within Dataprocés' strategic focus areas and are not considered to change the announced financial guidance. Changes in guidance are only made in the event of total and significant changes in the underlying business.

As MARS, MARC, KØS and KommuneProfil are central to Dataprocés' SaaS strategy, all sales of software solutions are announced – both to new municipalities and by expansion to existing customers.

In addition, the following are announced:

- Data analysis tasks with an expected fee of more than DKK 250,000.
- All international sales, regardless of contract value

In investor announcements, municipalities are named according to size to ensure uniform communication:

- The 50 smallest municipalities municipalities
- The 38 middle larger municipalities
- The 10 largest top-10 municipalities
