

## New policy for company announcements

22.4.2021 13:58:22 CEST | Dataprocés Group A/S | Company Announcement

Company announcement no. 15: New policy for company announcements from Dataprocés A/S. Four agreements are therefore announced.

We want to give the market a more accurate and transparent view of the activities in Dataprocés. The Board of Directors have therefore decided to adjust Dataprocés' internal guidelines. This means, that we continuously will inform about more new agreements and collaborations. In the future, we will inform the market of new agreements on data analyzes estimated to have a higher value than DKK 250,000 compared to the previous DKK 1,000,000.

In the future, we will also inform the market of new agreements on our MARC Fleksløn solution, which is part of the SaaS business.

In the period from the listing on November 13<sup>th</sup> 2020 to today, this would have meant two additional announcements on data analyzes as well as two announcements on our MARC Fleksløn solution on SaaS agreements.

The guidance for the year has not been changed due to the mentioned agreements.

### Generally about announcements

The contract is in accordance with Dataprocés' strategic focus and does not change the announced guidance.

In all announcements Dataprocés distinguishes between three municipality size categories; the 50 smallest municipalities are called municipalities, the 38 middle ones are called larger municipalities and the 10 largest are called top-10 municipalities.

Dataprocés only announces agreements on data analyzes with a total estimated value higher than 250,000 DKK.

The SaaS platforms MARS, Min Sag and MARC Fleksløn are central to the company strategy and will be announced each time an agreement has been entered into.

### About Dataprocés Group A/S

Dataprocés is an innovative IT and consulting house, specializing in solutions targeted at the Danish municipalities and their digital administration. The solutions range widely from robot technology and SaaS, to data analysis as well as collaboration and consulting. The starting point and purpose are always the same: to use data to create new knowledge, smarter processes and increased efficiency for the benefit of both citizens and municipalities.

**Dataprocés - we create value with data!**
