

Municipality buys MARC Fleksløn and MARC Ydelseskontrol

20.3.2024 13:22:53 CET | Dataprocés Group A/S | Investor News

Investor news no. 13/2024: Dataprocés has on March 20th entered into an agreement on our SaaS solutions MARC Fleksløn and MARC Ydelseskontrol.

The agreement for MARC Fleksløn and MARC Ydelseskontrol has been entered into with a municipality on Zealand. The municipality is now no. 61 on MARC Fleksløn.

MARC Fleksløn (Flex Job Subsidies) is a robotic solution, that automates the monthly calculations of the subsidies and makes the recalculations more efficient. The solution runs with integration to Kommunernes Ydelsessystem, KY. By using MARC Fleksløn, 50-70% of the municipality's monthly calculations of subsidies are automated.

General information about agreement announcements as investor news:

All announced agreements are in accordance with Dataprocés' strategic focus and do not change the announced guidance.

As the SaaS platforms MARS, MARC, REVIEW and KØS are central to the guided company strategy, each time a agreement is entered into with a new municipality, it is announced - as well as in the case of an agreement to extend delivery within one of the areas to an already existing customer, if the annual turnover from it is expected to exceed DKK 100,000.

Furthermore, it is announced when an agreement is entered into for the delivery of a DataAnalysis task where the expected fee is greater than DKK 250,000. Similarly, if agreements are entered into for delivery to a new customer in a new customer group, where the expected fee is greater than DKK 250,000

Dataprocés distinguishes in the announcements between 3 municipality size categories; the 50 smallest municipalities are called municipalities, the 38 middle ones are called larger municipalities and the 10 largest are called top-10 municipalities.
