

Larger municipality on Zealand expands with MARC Helbredstillæg and MARC Afstemning

31.5.2024 09:52:55 CEST | Dataprocés Group A/S | Investor News

Investor news no. 28/2024: Dataprocés has on May 31st entered into an agreement on our SaaS solution MARC Helbredstillæg and MARC Afstemning.

The agreements on MARC Helbredstillæg and MARC Afstemning has been entered into with a larger municipality on Zealand. The municipality was already a customer of our MARC platform, but is now expanding the collaboration with Dataprocés.

MARC Helbredstillæg automates and supports the work involved in processing the health allowance. The solution automates the majority of invoice processing for both electronic and physical invoices, benefiting citizens, employees, and the municipality as a whole.

MARC Afstemning is our SaaS solution that automates administrative, digital tasks and workflows with the software robot MARC and thereby assists in performing repetitive, manual work 2 to 10 times faster than a human, retrieves and moves data across systems - regardless of source, amount and format as well as checks and verifies data across sources and systems.

General information about agreement announcements as investor news:

All announced agreements are in accordance with Dataprocés' strategic focus and do not change the announced guidance.

As the SaaS platforms MARS, MARC, REVIEW and KØS are central to the guided company strategy, each time a agreement is entered into with a new municipality, it is announced - as well as in the case of an agreement to extend delivery within one of the areas to an already existing customer, if the annual turnover from it is expected to exceed DKK 100,000.

Furthermore, it is announced when an agreement is entered into for the delivery of a DataAnalysis task where the expected fee is greater than DKK 250,000. Similarly, if agreements are entered into for delivery to a new customer in a new customer group, where the expected fee is greater than DKK 250,000.

Dataprocés distinguishes in the announcements between 3 municipality size categories; the 50 smallest municipalities are called municipalities, the 38 middle ones are called larger municipalities and the 10 largest are called top-10 municipalities.
