39 municipalities have bought Dataproces' MARS platform

7.6.2024 14:55:55 CEST | Dataproces Group A/S | Investor News

Investor news no. 30/2024: Dataproces has of June 7th entered into an agreement with a larger municipality on Zealand on our SaaS solution MARS.

The agreement has been signed with a larger municipality on Zealand on MARS. This is the 39th municipality to purchase our platform.

By using MARS, the municipality gets a platform which contributes to creating an overview of all municipal financial payments and refunds while the platform streamlines digital administration and contributes to a correct foundation of data.

General information about agreement announcements as investor news:

All announced agreements are in accordance with Dataproces' strategic focus and do not change the announced guidance.

As the SaaS platforms MARS, MARC, REVIEW and KØS are central to the guided company strategy, each time an agreement is entered into, it is announced - as well as in the case of an agreement to extend delivery within one of the areas to an already existing customer, if the annual turnover from it is expected to exceed DKK 100,000.

Furthermore, it is announced when an agreement is entered into for the delivery of a DataAnalysis task where the expected fee is greater than DKK 250,000. Similarly, if agreements are entered into for delivery to a new customer in a new customer group, where the expected fee is greater than DKK 250,000.

Dataproces distinguishes in the announcement of SaaS agreements between 3 municipality size categories; the 50 smallest municipalities are called municipalities, the 38 middle ones are called larger municipalities and the 10 largest are called top-10 municipalities.
