

BactiQuant

BactiQuant modtager ordre på endnu en prøvetagningsrobot til Pharma

12.12.2025 14:50:08 CET | BactiQuant A/S | Investor News

Det glæder BactiQuant at meddele, at vi har modtaget en ordre på en prøvetagningsrobot til vores store pharmakunde. Det er en mindre, men strategisk vigtig ordre, fordi den skal leveres til en helt ny fabrik som stadig er i byggefasen. Robotsampleren forventes leveret i midten af januar 2026.

CEO, Morten Miller udtaler: "Det er en mindre ordre, men den er vigtig fordi der er tale om en såkaldt "Green Field" facilitet, det vil sige en helt ny fabrik der er bygget fra grunden. Fabrikken er således "state of the art" og derfor ser vi ordren som en tillidserklæring til vores teknologi, som vi er glade for".

About BactiQuant A/S

Bactiquant has developed a technology that will revolutionize the monitoring of bacterial contamination levels in water and ensure optimum usage and handling of water around the world to the benefit of our customers and the sustainability of our planet. To show our environmental commitment, we have aligned our business with four of the UN's Sustainable Development Goals. We believe that Bactiquant will be the world leader within mobile and online surveillance of bacterial contamination levels, and we are already well on our way. Headquartered in Denmark and operating across five continents, our customers come from a wide range of industries such as public water utility companies, industries needing water cooling or requiring wastewater treatment, and aquaculture.
