BactiQuant styrker sin indsats overfor kraftvarmeværker i Skandinavien med indgåelse af ny agentaftale

1.4.2022 13:22:18 CEST | BactiQuant A/S | Investor Nyheder

BactiQuant har indgået en ny agentaftale med den svenske virksomhed Hultgren Miljö & HälsoDesign AB, som har aktiviteter i Sverige og Finland.

Det glæder BactiQuant, at vi nu med en ny agentaftale for Sverige og Finland styrker vores indsats over for kraftvarmeværker i Skandinavien. Aftalen er kommet i hus på baggrund af vores succesfulde implementering af BactiQuant teknologi på Ørstedes nyligt renoverede kraftvarmeværk i Herning. Ejer af Miljö & HälsoDesign AB, Bram Faaij Hultgren udtaler:

"The technology developed and provided by BactiQuant gives us and our clients a possibility to trouble-shoot and monitor membrane based water filtration plants. For Miljö & HälsoDesign AB, it provides a tool to search until we find the trouble causing spot in the system within very little time, and thus be able to provide the end customer with accurate information and a recommendation to deal with the issue. Brackish water reuse is more and more demanded in our work field and in this segment bacterial growth is a potential risk. Therefore implementation of BactiQuant technology for ongoing monitoring of the bacterial content gives our clients an early warning of bacterial issues and the ability too initiate control measures before it is too late - saving considerable costs associated with remediation and down time of the system"

CEO Claus Vorreiter Jensen udtaler: " Når investeringer i BactiQuant teknologi hurtigt er tjent hjem, så har vi identificeret et godt markedsegment. Implementeringen af vores teknologi på Ørsted værket har vist sig at løse en væsentlig vandkvalitetsudfordring, som giver øgede omkostninger og i værste fald kan betyde, at man må lukke vandsystemet ned for at løse problemet. Aftalen med Miljö & HälsoDesign AB, som er en meget kompetent og erfaren aktør inden for kraftvarmeværker, er en vigtig aftale for vores markedsføring i Sverige og Finland.

Om BactiQuant A/S

BactiQuant has developed a technology that will revolutionize the monitoring of bacterial contamination levels in water and ensure optimum usage and handling of water around the world to the benefit of our customers and sustainability of our planet. To show our commitment to the environment, we have aligned our business with four of the UN's Sustainable Development Goals. We believe that BactiQuant will be the world leader within mobile and online surveillance of bacterial contamination levels, and we are already well on our way. Headquartered in Denmark and operating across five continents, our customers come from a wide range of industries such as public water utility companies, industries needing water cooling or requiring wastewater treatment, as well as aquaculture.
