

Odico A/S secures order for "Project Himmel" in Copenhagen

8.11.2023 12:30:00 CET | Odico A/S | Investor News

Odico A/S are happy to announce a new order for the "Project Himmel". This visionary project, initiated by Copenhagen Municipality in collaboration with the accomplished artist Marianne Jørgensen and advisors Rambøll and Schønher, aims to create a functional and poetic art installation within Glenteparken.

Investor News 09-2023

"Project Himmel" is an integral part of reimagining flood defenses and the role of art within this context. The park's rejuvenation is part of a broader urban transformation project in Copenhagen, seeking to combine urban improvements with flood protection in the Fuglekvarteret area of Nørrebro.

"Project Himmel" is a captivating and innovative bench-style seating and play area creatively designed in the shape of the word "Himmel" (sky). Crafted from concrete with a serene sky-blue hue, this unique installation not only offers a comfortable and inviting place to sit but also provides an imaginative play space that embodies the essence of the sky.

The park is envisioned as a place where children can enjoy a unique and imaginative play experience, perhaps pretending that the ground is treacherous. To facilitate easy maintenance, the sides are designed with slopes to allow leaves and debris to slide away, simplifying upkeep.

The Odico Formwork solution

Odico's contribution to this innovative project is the delivery of formwork for the casting of "Himmel." The finished result will feature a smooth, inviting surface that meets the project's requirements for comfort and playability. Odico will employ the same cutting-edge technology that has been utilized successfully in previous projects, ensuring the highest quality in the final product.

The order for this endeavor is around a quarter of a million Danish Krone (DKR).

Odico A/S are thrilled to be part of this visionary undertaking, merging art and infrastructure to create a unique and welcoming space for the community. As "Project Himmel" takes shape in Glenteparken, it promises to be a testament to the creative fusion of art and engineering, enhancing both the aesthetic and functional aspects of urban spaces.

About Odico A/S

Odico A/S utilizes cutting-edge robotic solutions to increase efficiency and precision in the construction industry. Odico's state-of-the-art robotics technology automates traditionally labor-intensive tasks, leading to significantly increased productivity and cost savings.

With a focus on reducing material waste and CO2 emissions, Odico is leading the way in digital manufacturing and scalable robotic solutions, shaping the future of the industry through innovation.

Odico A/S prides itself on being at the forefront of innovation for a sustainable future.
