

Odico Continues its Robotic Revolution with a Million DKK Order

14.11.2023 10:51:24 CET | Odico A/S | Investor News

Odico is happy to share great news about their ongoing journey in the world of construction robotics. Recently they have welcomed a new customer who has placed a significant order of approximately 1 million DKK.

Investor News 12-2023

The new order represents a collaborative venture between Odico and the customer, involving the precision fabrication of prefab wooden elements tailored for efficient and sustainable house construction. This order mirrors the recently announced 4 million DKK order (Company Announcement 75-2023), reaffirming Odico's commitment to a consistent and impactful approach in providing innovative solutions for construction.

What sets this order apart is its dedication to environmental responsibility. The prefab wooden elements are thoughtfully designed with reusability in mind, contributing to a circular economy even when disassembled.

“We are thrilled to receive confirmation that our strategic direction is on point. The recent order, echoing the 4 million DKK contract, underscores the market's high demand for our precision-crafted prefab wooden elements. This validation motivates us to persist in delivering innovative solutions that redefine construction standards.” says CCO Alexander N. Andersen

The order is set for delivery during December 2023.

About Odico A/S

Odico A/S utilizes cutting-edge robotic solutions to increase efficiency and precision in the construction industry. Odico's state-of-the-art robotics technology automates traditionally labor-intensive tasks, leading to significantly increased productivity and cost savings.

With a focus on reducing material waste and CO2 emissions, Odico is leading the way in digital manufacturing and scalable robotic solutions, shaping the future of the industry through innovation.

Odico A/S prides itself on being at the forefront of innovation for a sustainable future.
