

Hydract A/S lander ordre på Basic ventiler til Carlsberg Fredericia

14.12.2022 10:59:18 CET | Hydract A/S | Investor Nyheder

Carlsberg Fredericia laver mindre produktionsændring og fortsætter med at udvide med Hydracts ventiler.

Investornyhed nr. 1

Hydract er glade for at kunne meddele, at samarbejdet med Carlsberg nu resulterer i endnu en ordre på ventiler til bryggeriet i Fredericia. Ordren ændrer ikke på årets guidance fra selskabsmeddelelse nr. 16 den 13. oktober 2022.

Ordren omfatter ventiler i forskellige størrelser og konfigurationer. Det viser, at udvidelsen af vores produktprogram har været et succesfuldt strategisk valg for Hydract. Ordren skal leveres hurtigst muligt, og vi er sammen med vores underleverandører i fuld gang med at producere. På grund af den sene ordre bliver omsætningen i 2022 baseret på en færdiggørelsesgrad, da ordren først fysisk bliver installeret i begyndelsen af 2023.

Om Carlsberg Fredericia

Fredericia bryggeriet er et produktionsanlæg under Carlsberg Danmark, som består af bryggeri, sodavandstapperi og lagerterminal. Bryggeriet er taget i brug i 1979 og udvidet flere gange. Flere bryggerier er fusioneret ind i Carlsberg Fredericia og bryggeriet er i dag producent af størstedelen af øl og sodavand til Skandinavien inden for brands i Carlsberg. Hydract har installeret mere end 600 ventiler hos Carlsberg Fredericia og ikke mindst Hydracts Advanced anlæg som blev igangsat i marts 2021.

Hydract A/S receives order for Basic valves to Carlsberg Fredericia

Investor news no. 1

Carlsberg Fredericia makes minor production change and continues to expand with Hydract valves.

Hydract is pleased to announce that the collaboration with Carlsberg will now result in another order for valves for the brewery in Fredericia. The order does not change the guidance for the year from company announcement no. 16 on 13 October 2022.

The order includes valves of various sizes and configurations. This shows that the expansion of our product range has been a successful strategic choice for Hydract. The order must be delivered as soon as possible, and together with our subcontractors, we are in the process of producing. Due to the late order, revenue in 2022 will be based on a completion rate, as the order will not be physically installed until the beginning of 2023.

About Carlsberg Fredericia

Fredericia brewery is a production facility under Carlsberg Danmark which is a brewery, soda bottling plant and stock terminal. The brewery started in 1979 and has been expanded multiple times. Different breweries are merged into Carlsberg Fredericia and the brewery is today producer of the major part of beer and soda to Denmark within the Carlsberg brands. Hydract have installed more than 600 valves at Hydract Fredericia including the Hydract Advanced facility which started producing in March 2021.
