

RISMA announces release of new solution, The Digital Operational Resilience Act (DORA)

3.5.2024 12:57:06 CEST | Risma Systems A/S | Investor News

RISMA is happy to announce the launch of a software solution for compliance with the Digital Operational Resilience Act (DORA). The solution is designed for companies in the financial sector. The solution is available in English, but will be available in Danish, Swedish and Norwegian as and when the authorities release the respective translations.

Lars Nybro Munksgaard, CEO & Founder, says:

"DORA is one of the top priorities in the compliance functions in companies in the financial sector in EU over the next year. With the launch of a solution for DORA, RISMA reinforces its commitment to offering our customers with governance solutions for new important compliance areas. The solution has been developed with Plesner Law Firm who has enriched the solution with a structured approach, help, guidance and automatization. It is definitely the most extensive solution developed in cooperation with Plesner since RISMA's GDPR solution was launched in 2017. I also believe it is the jointly developed solution with the most commercial potential since the GDPR-solution."

About Risma Systems A/S

RISMA is a leading SaaS company empowering companies to take their governance, risk and compliance effort to the next level. We believe in the value of good corporate citizenship, and our customers share our vision of aspiring to make a positive difference in complying with both regulatory and stakeholder expectations.

Our software platform supports our customers to be in control and decision wise when structuring, handling, and documenting their efforts across governance, risk, and compliance. Our core GRC suite offers eight business-critical solutions relevant for all companies regardless of size and industry – GDPR & Privacy, ISMS & ISO27001, ESG & sustainability, Enterprise Risk, Financial & Internal controls, Vendors & Contracts, Policy Management, and Incident Management

RISMA is listed on Nasdaq First North with a mission to become a leading GRC platform for medium and enterprise businesses and organizations. We believe that being a good business – is really great for business.
