About Aquaporin A/S

The Company is a water technology company headquartered in Denmark with operations in Denmark, Singapore and the United States. The aim of the Company's technology is to contribute to a more sustainable world by focusing on encouraging responsible consumption of water. As a result, the Company is committed to developing and providing cost-efficient, sustainable and environmentally responsible solutions to the growing need for access to clean drinking water, treating and reusing wastewater and improving concentration and separation performance. For this purpose, the Company has developed a proprietary and patent-protected formulation for the protein aquaporin, which enables a high rejection rate of pollutants, high recovery rate of clean water and low energy consumption. The Company's proprietary technology, Aquaporin Inside®, is based on Nobel Prize-winning research and used to clean and reuse water in our homes and in the industrial water and food and beverage industry. Aquaporin works with customers and partners around the globe to sustainably treat industrial wastewater, concentrate food and beverage products and enhance drinking water quality and accessibility.
