

Copyright Agent expands to Spain and The Czech Republic, providing their full-service IPaaS to 16 markets.

16.2.2022 14:30:00 CET | Copyright Agent A/S | Investor News

With the expansion, Copyright Agent is now active in 16 markets across 3 continents where the company offers their full-service solution to their clients.

Copyright Agent now services a total of 16 markets, nine of which they have entered since July 2021, representing a 150% growth in active markets since they were listed as a publicly traded company at Nasdaq First North Growth Market with the stock symbol (ticker) COPY.

The company offers their IPaaS (Intellectual Property Rights as a Service) solution for safeguarding original image and text content against other companies' unauthorized use online, to the following markets:

- Denmark
- Norway
- Sweden
- Finland
- The United Kingdom
- Germany
- Austria
- Poland
- Belgium
- The Netherlands
- Estonia
- France
- Chile
- Australia
- The Czech Republic
- Spain

We see clearly the effect of Copyright Agent's overall strategy, where the entry into each new country both establishes and opens up a market for the company's existing clients. This allows Copyright Agent to add new markets to the collaborations in their existing customer base, evidently increasing and enhancing the full value of each contract.

Copyright Agent's continuous expansion to three continents can be considered a manifestation of the global need among clients for sustainably and professionally safeguarding their investments in their intellectual property rights. This is a clear testimony to the steadily rising need for Copyright Agent's full-service IPaaS technology and service.

Copyright Agent's CEO, Henrik Eggert states:

"The recent openings of new markets is inline with our overall plan for expansion and globalization. Despite a world that has been - and still is - affected by the pandemic, we as a Legal Tech company, are generally experiencing less volatility and uncertainty than companies with greater supply-chain dependency. The digitalization is booming and has accelerated in the past few years, naturally creating an even greater demand for our technology and services".

Copyright Agent is entering their silent period after this week and until the release of their annual report. Therefore, this is the last press release before the publishing of their annual report on March 21st 2022.
