

## Q-Interline has received an order from a production site in Columbia through a European key account

8.7.2026 15:03:36 CEST | Q-Interline A/S | Investor News

Q-Interline is pleased to announce that a leading global key account within the oils and fats industry has placed an order for a Quant system with a Vial Sampler for edible oils and fats analysis. The order has been secured under an existing global framework agreement and reflects the continued expansion of Q-Interline technology across the customer's international operations.

The instrument will be installed in September 2026 at the customer's production facility in Colombia. By utilizing the Quant with global calibration models, the customer will achieve standardized analytical performance and consistent quality.

Q-Interline's solutions provide customers with high analytical performance and lower cost of ownership. Since our solutions don't require scheduled maintenance, they are ideal for implementation across multiple sites and regions, like in the case of this particular global customer.

This order marks another important milestone in the ongoing collaboration and further strengthens Q-Interline's position as a trusted provider of advanced analytical solutions to the global oils and fats industry.

VP Global Sales Per Sand says: *"This order represents another important step forward in our collaboration with one of the industry's leading global companies and demonstrates the scalability of the Q-Interline technology within large international organizations. The continued expansion of our installed base reflects the strong relationship we have with our customers and reinforces Q-Interline's role as a trusted analytical technology partner to the food and ingredients industry."*

### **About Q-Interline A/S**

Q-Interline is a technology company that develops high-tech analytical solutions for optimising process efficiency and product quality, based on infrared spectroscopy and correct sampling techniques.

The company develops both its own front-end software solutions and software for automated cloud-based monitoring of analytical instruments and mathematical calibration models.

Q-Interline is among the leading suppliers of analytical equipment to the dairy industry in Scandinavia and has delivered analytical systems to customers in 45 countries worldwide across the food and dairy industries, agriculture, pharmaceutical manufacturing, and the chemical industry.

For more than 29 years, the company has accumulated extensive industry expertise and developed innovative patented solutions for food analysis. Today, Q-Interline offers a competitive product portfolio built on leading-edge technology.

Through its solutions, Q-Interline contributes to the sustainable use of raw materials in food production while helping to ensure that the quality of produced food supports the health and well-being of both humans and animals.
