Q-Interline GmbH receives order for an InSight Pro system from a dairy group in the DACH region

10.11.2026 10:02:10 CET | Q-Interline A/S | Investor News

Q-Interline GmbH has received an order for an InSight Pro system from a new customer in the dairy industry in the DACH region. The solution will be used for mozzarella analysis and quality control and marks the customer's first order with Q-Interline.

The order is the result of dedicated sales efforts by Q-Interline's German organization and supports the company's continued strengthening of its position within the dairy sector in the DACH region. Installation is scheduled for March 2027.

Analyzing Mozzarella is a well-known application for Q-Interline, but the order represents an important expansion of the company's customer base within the dairy industry in the DACH-region. Following the implementation of the first InSight Pro system, there is potential for further rollout to additional production lines at the customer's facilities over time.

"We are very pleased to have received this order and look forward to establishing a close collaboration with the customer. The fact that a new dairy group has chosen Q-Interline's technology for quality control and process optimization highlights the value our solutions bring to the dairy industry," says Benjamin Schade, Sales Manager DACH.

About Q-Interline A/S

Q-Interline is a technology company that develops high-tech analytical solutions for optimising process efficiency and product quality, based on infrared spectroscopy and correct sampling techniques.

The company develops both its own front-end software solutions and software for automated cloud-based monitoring of analytical instruments and mathematical calibration models.

Q-Interline is among the leading suppliers of analytical equipment to the dairy industry in Scandinavia and has delivered analytical systems to customers in 53 countries worldwide across the food and dairy industries, agriculture, pharmaceutical manufacturing, and the chemical industry.

For more than 30 years, the company has accumulated extensive industry expertise and developed innovative patented solutions for food analysis. Today, Q-Interline offers a competitive product portfolio built on leading-edge technology.

Through its solutions, Q-Interline contributes to the sustainable use of raw materials in food production while helping to ensure that the quality of produced food supports the health and well-being of both humans and animals.
