Q-Interline GmbH receives second order from major dairy group in the DACH region

13.11.2026 13:06:52 CET | Q-Interline A/S | Investor News

On 10 November 2026, Q-Interline announced that the company had received an order for an Insight Pro system from a new customer in the dairy sector in the DACH region. Q-Interline is now pleased to announce that the same customer has ordered a second Insight Pro system for delivery this year.

Both orders are the result of a successful pilot project at the customer's site and underscore Q-Interline's continued commercial momentum in the DACH region.

The InSight Pro system will be used for in-line process and quality control in the customer's production and is expected to be installed in December 2026.

The order further strengthens Q-Interline's position in the DACH region and confirms the growing interest in the company's analytical and process optimization solutions among international dairy producers.

Based on the successful collaboration with the customer, Q-Interline expects this to be further expanded through additional system orders in the coming period.

About Q-Interline A/S

Q-Interline is a technology company that develops high-tech analytical solutions for optimising process efficiency and product quality, based on infrared spectroscopy and correct sampling techniques.

The company develops both its own front-end software solutions and software for automated cloud-based monitoring of analytical instruments and mathematical calibration models.

Q-Interline is among the leading suppliers of analytical equipment to the dairy industry in Scandinavia and has delivered analytical systems to customers in 53 countries worldwide across the food and dairy industries, agriculture, pharmaceutical manufacturing, and the chemical industry.

For more than 30 years, the company has accumulated extensive industry expertise and developed innovative patented solutions for food analysis. Today, Q-Interline offers a competitive product portfolio built on leading-edge technology.

Through its solutions, Q-Interline contributes to the sustainable use of raw materials in food production while helping to ensure that the quality of produced food supports the health and well-being of both humans and animals.
