

Hove A/S receives first order from APM Terminals

After completing a pilot project, APM Terminals Bahrain has chosen to implement Hove A/S' lubrication solution, including the advanced Hove Smart Lube IoT system, which documents that the right grease is injected in the right place in the right amount. This is the first time that Hove Smart Lube has been used commercially. Hove's management sees this as a minor breakthrough, but of strategic importance in the commercialization of Hove's technology for servicing cranes in port terminals.

About Hove

Hove is a supplier of lubrication solutions for mechanical bearings, primarily in the wind turbine industry. Hove's solutions provide customers with significant annual operating cost savings, while at the same time ensuring that lubrication is performed and documented correctly, which extends the life of the bearings. Over the past 20 years, Hove has set new standards for lubrication in the wind turbine industry. Hove's patented IoT solution will strengthen Hove's position as market leader. With its unique product and an experienced team, Hove has achieved a strong market position in the wind turbine industry and an international presence.
